05/09/2001 18:59:51

/C O R R E C T I O N -- JOHNSON & JOHNSON AND INVERNESS MEDICAL TECHNOLOGY/ PR
News Wire via Dow Jones

In JOHNSON & JOHNSON and Inverness Medical Technology In Discussions for JOHNSON & JOHNSON to Acquire Inverness's Diabetes Care Products Business In \$1.3 Billion Stock for Stock Transaction, moved earlier today, we are advised by a representative of the companies that a second paragraph under the section "Additional Information and Where to Find It" was inadvertently omitted. The missing paragraph reads as such:

In the event an agreement is reached, Inverness Medical Technology, its directors, and certain of its executive officers may be considered participants in the solicitation of proxies in connection with the proposed transactions. Information about the directors and executive officers of Inverness Medical Technology and their ownership of Inverness Medical Technology stock is set forth in the proxy statement for Inverness Medical Technology's 2001 annual meeting of shareholders. Investors may obtain additional information regarding the interests of such participants by reading the prospectus/proxy statement if and when it becomes available.

The complete, corrected press release follows:

JOHNSON & JOHNSON and Inverness Medical Technology In Discussions for JOHNSON & JOHNSON to Acquire Inverness's Diabetes Care Products Business

In \$1.3 Billion Stock for Stock Transaction

Inverness Would Split-Off Non-Diabetes

Businesses Into New Publicly Traded Company

NEW BRUNSWICK, N.J. and WALTHAM, Mass., May 9 /PRNewswire/ -- JOHNSON & JOHNSON

2

(NYSE: JNJ), the world's most comprehensive and broadly based manufacturer of health care products, and Inverness Medical Technology (Amex: IMA), a developer of innovative products focused primarily on the self-management of diabetes, today announced they are in advanced discussions regarding a definitive agreement, whereby JOHNSON & JOHNSON would acquire Inverness, excluding certain businesses, in a stock-for-stock exchange. At the time of the acquisition, Inverness would split off its businesses in women's health, nutritional supplements and clinical diagnostics to form a new publicly traded company owned by Inverness shareholders.

Under the terms being discussed, shareholders of Inverness would receive JOHNSON & JOHNSON common stock with a value of \$35.00 a share, plus a common stock interest in the new company, for each share of Inverness. The net equity value of the diabetes care products business would be approximately \$1.3 billion,

Edgar Filing: INVERNESS MEDICAL TECHNOLOGY INC/DE - Form 425

based on Inverness's 38 million fully diluted shares outstanding. JOHNSON & JOHNSON would account for the transaction under the purchase method. Without considering the additional value of the split-off to Inverness shareholders, the \$35 price represents a 20 percent premium to the prior 20-day trading average.

The business to be acquired by JOHNSON & JOHNSON would include Inverness's electrochemical blood glucose meter and strip business (including the ONE TOUCH FastTake and ONE TOUCH Ultra meters and strips), and two recent Inverness acquisitions -- the LXX Corporation, which makes dual glucose and fructosamine monitors, and Integ, which has developed advanced interstitial fluid sampling technology. In addition, JOHNSON & JOHNSON would gain rights to the Debiotech S.A. insulin pump license.

The new company would retain rights to utilize Inverness's electrochemical and interstitial technology platform for certain diagnostic applications outside the field of diabetes. The company would be led by the current Inverness corporate management team based in Waltham, Massachusetts.

For JOHNSON & JOHNSON, in 2001, there would be a one-time charge of approximately \$100 million or \$.07 per share, primarily associated with in-process research and development. Additionally, based on proposed accounting rules regarding the treatment of goodwill scheduled to be implemented next quarter, JOHNSON & JOHNSON estimates dilution would be \$.02 in 2001, \$.02 in 2002, and accretive thereafter. Excluding the one-time charges, JOHNSON & JOHNSON expects to fund the impact on 2001 and 2002 earnings per share and therefore remains comfortable with its previous earnings guidance.

In April, JOHNSON & JOHNSON indicated that excluding the impact of the pending ALZA transaction, it was comfortable toward the middle of the 2001 earnings per share estimates, which range from \$3.85 to \$3.90. With regard to 2002, JOHNSON & JOHNSON indicated it was comfortable with the consensus earnings per share estimate of \$4.35.

There can be no assurance that a definitive agreement regarding such an acquisition will be reached or that any acquisition will result from these discussions. Neither JOHNSON & JOHNSON nor Inverness intends to make any additional comments regarding this matter unless and until a formal definitive agreement has been reached or the discussions have been terminated.

Inverness Medical Technology develops, manufactures, and markets innovative products focused primarily on diabetes self-management. Inverness also markets diabetes products as well as a line of women's health products to consumers through its own established retail distribution networks including Wal-Mart, CVS and Walgreens.

Inverness Medical Technology's manufacturing facilities are located in Inverness, Scotland;
