FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q includes certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements can be identified by the use of forward-looking terminology including may, believe, expect, anticipate, estimate, continue, or other similar words. The statements regarding (i) the Shreveport refinery expansion project's expected completion date, its estimated cost, the resulting increases in production levels, our ability to amend our credit facilities to permit increased capital expenditures associated with the expansion project and our ability to successfully dismiss pending litigation challenging the air permit related to the expansion project and (ii) expected settlements with the Louisiana Department of Environmental Quality (LDEQ) or other environmental liabilities, as well as other matters discussed in this Form 10-Q that are not purely historical data, are forward-looking statements. These statements discuss future expectations or state other forward-looking information and involve risks and uncertainties. When considering these forward-looking statements, unitholders should keep in mind the risk factors and other cautionary statements included in this quarterly report and in our Annual Report on Form 10-K filed on February 23, 2007. These risk factors and cautionary statements noted throughout this Form 10-Q could cause our actual results to differ materially from those contained in any forward-looking statement. These factors include, but are not limited to:

the overall demand for specialty hydrocarbon products, fuels and other refined products;

our ability to produce specialty products and fuels that meet our customers' unique and precise specifications;

the results of our hedging activities;

the availability of, and our ability to consummate, acquisition or combination opportunities;

our access to capital to fund expansions or acquisitions and our ability to obtain debt or equity financing on satisfactory terms;

successful integration and future performance of acquired assets or businesses;

environmental liabilities or events that are not covered by an indemnity, insurance or existing reserves;

maintenance of our credit rating and ability to receive open credit from our suppliers;

demand for various grades of crude oil and resulting changes in pricing conditions;

fluctuations in refinery capacity;

the effects of competition;

continued creditworthiness of, and performance by, counterparties;

the impact of crude oil price fluctuations;

the impact of current and future laws, rulings and governmental regulations;

shortages or cost increases of power supplies, natural gas, materials or labor;

weather interference with business operations or project construction;

fluctuations in the debt and equity markets; and

general economic, market or business conditions.

Other factors described herein, or factors that are unknown or unpredictable, could also have a material adverse effect on future results. Please read Part I Item 3 Quantitative and Qualitative Disclosures About Market Risk. Except as required by applicable securities laws, we do not intend to update these forward-looking statements and information.

References in this Form 10-Q to Calumet, the Company, we, our, us or like terms refer to Calumet Specialty Products Partners, L.P. and its subsidiaries. References to Predecessor in this Form 10-Q refer to Calumet Lubricants Co., Limited Partnership. The results of operations for the three months ended March 31, 2006 for Calumet include the results of operations of the Predecessor for the period of January 1, 2006 through January 31, 2006.

CALUMET SPECIALTY PRODUCTS PARTNERS, L.P.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(In thousands, except operating, unit and per unit data)

1. Partnership Organization and Basis of Presentation

Calumet Specialty Products Partners, L.P. (Calumet, Partnership, or the Company) is a Delaware limited partnership. The general partner is Calumet GP, LLC, a Delaware limited liability company. On January 31, 2006, the Partnership completed the initial public offering of its common units. At that time, substantially all of the assets and liabilities of Calumet Lubricants Co., Limited Partnership and its subsidiaries (Predecessor) were contributed to Calumet. References to the Predecessor in these unaudited condensed consolidated financial statements refer to Calumet Lubricants Co., Limited Partnership and its subsidiaries. On July 5, 2006, the Partnership completed a follow-on public offering of its common units. See Note 7 for further discussion of the units sold and proceeds from these offerings. As of March 31, 2007, the Partnership had 16,366,000 common units, 13,066,000 subordinated units, and 600,653 general partner equivalent units outstanding. The general partner owns 2% of Calumet while the remaining 98% is owned by limited partners. Calumet is engaged in the production and marketing of crude oil-based specialty lubricating oils, solvents, waxes and fuels. Calumet owns refineries located in Princeton, Louisiana, Cotton Valley, Louisiana, and Shreveport, Louisiana, and a terminal located in Burnham, Illinois.

The unaudited condensed consolidated financial statements of the Company as of March 31, 2007 and for the three months ended March 31, 2007 and 2006 included herein have been prepared, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and disclosures normally included in the consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations, although the Company believes that the following disclosures are adequate to make the information presented not misleading. These unaudited condensed consolidated financial statements reflect all adjustments that, in the opinion of management, are necessary to present fairly the results of operations for the interim periods presented. All adjustments are of a normal nature, unless otherwise disclosed. The results of operations for the three months ended March 31, 2007 are not necessarily indicative of the results that may be expected for the year ended December 31, 2007. These unaudited condensed consolidated financial statements should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2006 filed on February 23, 2007.

2. New Accounting Pronouncements

In July 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (the Interpretation), an interpretation of FASB Statement No. 109. The Interpretation clarifies the accounting for uncertainty in income taxes by prescribing a recognition threshold and measurement methodology for the financial statement recognition and measurement of a tax position to be taken or expected to be taken in a tax return. The Interpretation is effective for fiscal years beginning after December 15, 2006. The Company adopted the Interpretation on January 1, 2007. The adoption had no effect on the Company's financial position, results of operations or cash flow. Interest and penalties related to income taxes, if any, would be recorded in income tax expense on the condensed consolidated statements of operations. The Company had no unrecognized tax benefits as of March 31, 2007 and December 31, 2006. The Company's income taxes generally remain subject to examination by major tax jurisdictions for a period of three years.

In September 2006, the FASB issued FASB Staff Position No. AUG AIR-1, *Accounting for Planned Major Maintenance Activities* (the Position), which amends certain provisions in the AICPA Industry Audit Guides, *Audits of Airlines*, and APB Opinion No. 28, *Interim Financial Reporting*. The Position prohibits the use of the accrue-in-advance method of accounting for planned major maintenance activities (turnaround costs) and requires the use of the direct expensing method, built-in overhaul method, or deferral method. The Position is effective for fiscal years beginning after December 15, 2006.

The Company adopted the Position on January 1, 2007 and began using the deferral method to account for turnaround costs. Under this method, actual costs of an overhaul are capitalized as incurred and amortized to cost of sales until the next overhaul date. Prior to the adoption of this standard, the Company accrued for such overhaul costs in advance and recorded the charge to cost of sales. As a result of the adoption of the Position, the Company has

adjusted prior periods to account for turnaround costs as capitalized costs, recorded in other noncurrent assets on the consolidated balance sheets, in lieu of accrued turnaround costs. The cumulative effect of the adoption of the Position on prior periods was to increase partners' capital by \$3,318 as of January 1, 2005. The adoption of the Position resulted in a net decrease in cost of sales of \$299 (\$0.02 per limited partner unit) for the three months ended March 31, 2006 from the amount previously reported.

- 8 -

Table of Contents

In September 2006, the FASB issued FASB Statement No. 157, *Fair Value Measurements* (the Statement). The Statement applies to assets and liabilities required or permitted to be measured at fair value under other accounting pronouncements. The Statement defines fair value, establishes a framework for measuring fair value, and expands disclosure requirements about fair value, but does not provide guidance whether assets and liabilities are required or permitted to be measured at fair value. The Statement is effective for fiscal years beginning after November 15, 2007. The Company does not anticipate that this Statement will have a material effect on its financial position, results of operations, or cash flow.

3. Inventory

The cost of inventories is determined using the last-in, first-out (LIFO) method. Inventories are valued at the lower of cost or market value.

Inventories consist of the following:

	March 31, 2007	December 31, 2006
Raw materials	\$ 27,055	\$ 26,791
Work in process	30,306	30,130
Finished goods	50,345	54,064
	\$ 107,706	\$ 110,985

The replacement cost of these inventories, based on current market values, would have been \$45,472 and \$46,711 higher at March 31, 2007 and December 31, 2006, respectively.

4. Shreveport Refinery Expansion

The Company commenced an expansion project at its Shreveport refinery during the second quarter of 2006. Through March 31, 2007, the Company had incurred capital expenditures of \$100,473 (including capitalized interest of \$2,742) related to the expansion project, which is recorded to construction-in-progress, a component of property, plant and equipment. Management has estimated that the Company will incur approximately \$99,500 of additional capital expenditures in 2007 related to the expansion project. The expansion project is expected to be completed in the third quarter of 2007 with production ramping up in the fourth quarter of 2007. Management currently estimates the total cost of the Shreveport refinery expansion project will be approximately \$200,000, an increase of \$50,000 from the Company's previous estimate. This increase in the estimated cost of the expansion project is due to further escalation in construction costs and an enhancement in the project to allow the Shreveport refinery to run additional barrels per day of sour crude in the future subsequent to the planned completion of another capital project to add capacity and modify certain operating units.

5. Derivatives

The Company utilizes derivative instruments to minimize its price risk and volatility of cash flows associated with the purchase of crude oil and natural gas, the sale of fuel products and interest payments. In accordance with Statement of Financial Accounting Standards (SFAS) No. 133, *Accounting for Derivative Instruments and Hedging Activities*, which was amended in June 2000 by SFAS No. 138 and in May 2003 by SFAS No. 149 (collectively referred to as SFAS 133), the Company recognizes all derivative transactions as either assets or liabilities at fair value on the consolidated balance sheets. To the extent a derivative instrument is designated effective as a cash flow hedge of an exposure to changes in the fair value of a future transaction, the change in fair value of the derivative is deferred in accumulated other comprehensive income (loss), a component of partners' capital. The Company accounts for certain derivatives hedging purchases of crude oil and natural gas, the sale of gasoline, diesel and jet fuel and the payment of interest as cash flow hedges. The derivatives hedging purchases and sales are recorded to cost of sales and sales in the consolidated statements of operations, respectively, upon recording the related hedged transaction in sales or cost of sales. The derivatives hedging payments of interest are recorded in interest expense in the consolidated statements of operations. For the three months ended March 31, 2007 and 2006, the Company has recorded a

derivative gain of \$17,797 and \$0, respectively, to sales and a derivative loss of \$20,959 and \$340, respectively, to cost of sales. An interest rate swap loss of \$1 for the three months ended March 31, 2007 was recorded to interest expense. For derivative instruments not designated as cash flow hedges and the portion of any cash flow hedge that is determined to be ineffective, the change in fair value of the asset or liability for the period is recorded to unrealized gain or loss on derivative instruments in the consolidated statements of operations. The Company does not account for fuel products margin swap or collar contracts (crack spread swaps or collars) as cash flow hedges. As of March 31, 2007 and December 31, 2006, the Company has no such derivative contracts outstanding. Upon the settlement of a derivative not designated as a cash flow hedge, the gain or loss at settlement is recorded to realized gain or loss on derivative instruments in the consolidated statements of operations.

Effective April 1, 2006, the Company restructured and designated certain derivative contracts for its fuel products segment as cash

- 9 -

Table of Contents

flow hedges of gasoline, diesel, and jet fuel sales and crude oil purchases to the extent they qualified for hedge accounting, and the effective portion of these hedges is recorded in accumulated other comprehensive income (loss) on the consolidated balance sheets until the underlying transaction hedged is recognized in the consolidated statements of operations. Prior to this date, the historical impact of fair value fluctuations in our gasoline, diesel and crude oil derivative instruments for the fuel products segment had been reflected in the realized/unrealized gain (loss) on derivative instruments line items in the consolidated statements of operations. The Company utilizes third party valuations and published market data to determine the fair value of these derivatives. The decrease in realized and unrealized loss by \$14,282 from the three months ended March 31, 2006 to the same period in the current year was due to the designation of certain derivatives as cash flow hedges. Thus, the settlement value of these derivatives is reflected in gross profit in the current period as compared to unrealized and realized loss on derivative instruments during the same period in 2006.

The Company assesses, both at inception of the hedge and on an on-going basis, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in cash flows of hedged items. The Company's estimate of the ineffective portion of the hedges for the three months ended March 31, 2007 and 2006 were losses of \$7,513 and \$592, respectively, which was recorded to unrealized loss on derivative instruments in the consolidated statements of operations.

Comprehensive income (loss) for the Company consists of the changes in fair value of cash flow hedges and the gain or loss on cash flow hedges reclassified to net income. Comprehensive income for the three months ended March 31, 2007 and 2006 was as follows:

	Three Months Ended March 31,	
	2007	2006
Net income	\$ 28,210	\$ 3,831
Cash flow hedge (gain) loss reclassified to net income	(5,451)	278
Change in fair value of cash flow hedges	(61,854)	280
Total comprehensive income (loss)	\$ (39,095)	\$ 4,389

The effective portion of the hedges classified in accumulated other comprehensive income (loss) is (\$15,054) as of March 31, 2007 and, absent a change in the fair market value of the underlying transactions, will be reclassified to earnings by December 31, 2012 with balances being recognized as follows:

Year	Other Comprehensive Income (Loss)
2007	\$ (9,258)
2008	(6,767)
2009	(414)
2010	2,500
2011	(946)
2012	(169)
Total	\$ (15,054)

The Company is exposed to credit risk in the event of nonperformance with our counterparties on these derivative transactions. The Company does not expect nonperformance on any derivative contract.

Crude Oil Collar Contracts

The Company utilizes combinations of options to manage crude oil price risk and volatility of cash flows in its specialty products segment. These combinations of options are designated as cash flow hedges of the future purchase of crude oil. The Company's policy is generally to enter into crude oil derivative contracts for a period no greater than three to six months forward and for 50% to 75% of anticipated crude oil purchases related to its specialty products production. At March 31, 2007, the Company had the following derivatives related to crude oil purchases used in specialty products production.

- 10 -

Table of Contents

Crude Oil Put/Call Spread Contracts by Expiration Dates	Barrels	BPD	Average			
			Lower Put (\$/Bbl)	Upper Put (\$/Bbl)	Lower Call (\$/Bbl)	Upper Call (\$/Bbl)

Average price			\$ 45.78	\$ 55.78	\$ 65.78	\$ 75.78

At December 31, 2006, the Company had the following derivatives related to crude oil purchases for its specialty products production.

Crude Oil Put/Call Spread Contracts by Expiration Dates	Barrels	BPD	Average			
			Lower Put (\$/Bbl)	Upper Put (\$/Bbl)	Lower Call (\$/Bbl)	Upper Call (\$/Bbl)
January 2007	248,000	8,000	\$ 48.66	\$ 58.66	\$ 68.66	\$ 78.66
February 2007	224,000	8,000	49.28	59.28	69.28	79.28
March 2007	248,000	8,000	50.85	60.85	70.85	80.85
Totals	720,000					
Average price			\$ 49.61	\$ 59.61	\$ 69.61	\$ 79.61

Crude Oil Swap Contracts

The Company utilizes swap contracts to manage crude oil price risk and volatility of cash flows in its fuel products segment. The Company's policy is generally to enter into crude oil swap contracts for a period no greater than five years forward and for no more than 75% of crude oil purchases used in fuels production. At March 31, 2007, the Company had the following derivatives related to crude oil purchases in its fuel products segment, all of which are designated as hedges.

Crude Oil Swap Contracts by Expiration Dates	Barrels	BPD	(\$/Bbl)
Second Quarter 2007	1,728,000	18,989	\$ 64.68
Third Quarter 2007	1,742,000	18,935	65.51

Totals	28,751,000		
Average price			\$ 66.49

Fuels Product Swap Contracts

The Company utilizes swap contracts to manage diesel, gasoline and jet fuel price risk and volatility of cash flows in its fuel products segment. The Company's policy is generally to enter into diesel and gasoline swap contracts for a period no greater than five years forward and for no more than 75% of forecasted fuels sales.

- 11 -

Table of Contents***Diesel Swap Contracts***

At March 31, 2007, the Company had the following derivatives related to diesel and jet fuel sales in its fuel products segment, all of which are designated as hedges except for 157,430 barrels in 2007. The Company recognized a loss of \$365 in unrealized (loss) gain on derivative instruments in the consolidated statements of operations during the three months ended March 31, 2007.

Diesel Swap Contracts by Expiration Dates	Barrels	BPD	(\$/Bbl)
Second Quarter 2007	1,092,000	12,000	\$ 80.74
Third Quarter 2007	1,102,000	11,978	81.36

Natural Gas Swap Contracts

The Company utilizes swap contracts to manage natural gas price risk and volatility of cash flows. These swap contracts are designated as cash flow hedges of the future purchase of natural gas. The Company's policy is generally to enter into natural gas derivative contracts to hedge approximately 50% or more of its upcoming fall and winter months' anticipated natural gas requirements. At March 31, 2007, the Company had the following derivatives related to natural gas purchases.

Natural Gas Swap Contracts by Expiration Dates	MMbtu	\$/MMbtu
Third Quarter 2007	100,000	\$ 7.99
Fourth Quarter 2007	150,000	7.99
First Quarter 2008	150,000	7.99
Totals	400,000	
Average price		\$ 7.99

At December 31, 2006, the Company had the following derivatives related to natural gas purchases.

Natural Gas Swap Contracts by Expiration Dates	MMbtu	\$/MMbtu
First Quarter 2007	600,000	\$ 8.87
Third Quarter 2007	100,000	7.99

First Quarter 2008	150,000	7.99
Totals	1,000,000	
Average price		\$ 8.52

Interest Rate Swap Contracts

In 2006, the Company entered into a forward swap contract to manage interest rate risk related to its variable rate senior secured first lien term loan. The Company hedges the interest payments related to 85% of its future term loan indebtedness. This swap contract is designated as a cash flow hedge of the future payment of interest with three-month LIBOR fixed at 5.44% per annum.

6. Commitments and Contingencies

From time to time, the Company is a party to certain claims and litigation incidental to its business, including claims made by various taxing authorities as the result of audits or reviews of the Company's business. Management is of the opinion that the ultimate resolution of any known claims, either individually or in the aggregate, will not have a material adverse impact on the Company's financial position, results of operations or cash flow.

Environmental

The Company operates crude oil and specialty hydrocarbon refining and terminal operations, which are subject to stringent and complex federal, state, and local laws and regulations governing the discharge of materials into the environment or otherwise relating to environmental protection. These laws and regulations can impair the Company's operations that affect the environment in many ways, such as requiring the acquisition of permits to conduct regulated activities; restricting the manner in which the Company can

- 13 -

Table of Contents

release materials into the environment; requiring remedial activities or capital expenditures to mitigate pollution from former or current operations; and imposing substantial liabilities for pollution resulting from its operations. Certain environmental laws impose joint and several, strict liability for costs required to remediate and restore sites where petroleum hydrocarbons, wastes, or other materials have been released or disposed.

Failure to comply with environmental laws and regulations may result in the triggering of administrative, civil and criminal measures, including the assessment of monetary penalties, the imposition of remedial obligations, and the issuance of injunctions limiting or prohibiting some or all of the Company's operations. On occasion, the Company receives notices of violation, enforcement and other complaints from regulatory agencies alleging non-compliance with applicable environmental laws and regulations. In particular, the Louisiana Department of Environmental Quality (LDEQ) has proposed penalties totaling \$191 and supplemental projects for the following alleged violations: (i) a May 2001 notification received by the Cotton Valley refinery from the LDEQ regarding several alleged violations of various air emission regulations, as identified in the course of the Company's Leak Detection and Repair program, and also for failure to submit various reports related to the facility's air emissions; (ii) a December 2002 notification received by the Company's Cotton Valley refinery from the LDEQ regarding alleged violations for excess emissions, as identified in the LDEQ's file review of the Cotton Valley refinery; and (iii) a December 2004 notification received by the Cotton Valley refinery from the LDEQ regarding alleged violations for the construction of a multi-tower pad and associated pump pads without a permit issued by the agency. The Company is currently in settlement negotiations with the LDEQ to resolve these matters, as well as a number of similar matters at the Princeton refinery, for which no penalty has yet been proposed. The Company anticipates that any penalties that may be assessed due to the alleged violations at its Princeton refinery as well as the aforementioned penalties related to the Cotton Valley refinery will be consolidated in a settlement agreement that the Company anticipates executing with the LDEQ in connection with the agency's Small Refinery and Single Site Refinery Initiative described below.

The Company has recently entered into discussions on a voluntary basis with the LDEQ regarding the Company's participation in that agency's Small Refinery and Single Site Refinery Initiative. This state initiative is patterned after the EPA's National Petroleum Refinery Initiative, which is a coordinated, integrated compliance and enforcement strategy to address federal Clean Air Act compliance issues at the nation's largest petroleum refineries. The Company expects that the LDEQ's primary focus under the state initiative will be on four compliance and enforcement concerns: (i) Prevention of Significant Deterioration/New Source Review; (ii) New Source Performance Standards for fuel gas combustion devices, including flares, heaters and boilers; (iii) Leak Detection and Repair requirements; and (iv) Benzene Waste Operations National Emission Standards for Hazardous Air Pollutants. The Company is only in the beginning stages of discussion with the LDEQ and, consequently, while no significant compliance and enforcement expenditures have been requested as a result of the Company's discussions, the Company anticipates that it will ultimately be required to make emissions reductions requiring capital investments between approximately \$1,000 and \$3,000 over a three to five year period at the Company's three Louisiana refineries.

Voluntary remediation of subsurface contamination is in process at each of the Company's refinery sites. The remedial projects are being overseen by the appropriate state agencies. Based on current investigative and remedial activities, the Company believes that the groundwater contamination at these refineries can be controlled or remedied without having a material adverse effect on its financial condition. However, such costs are often unpredictable and, therefore, there can be no assurance that the future costs will not become material.

The Company is indemnified by Shell Oil Company, as successor to Pennzoil-Quaker State Company and Atlas Processing Company, for specified environmental liabilities arising from the operations of the Shreveport refinery prior to the Company's acquisition of the facility. The indemnity is unlimited in amount and duration, but requires the Company to contribute up to \$1,000 of the first \$5,000 of indemnified costs for certain of the specified environmental liabilities.

On December 27, 2006, the LDEQ approved the Company's application for a modification of its air emissions permit for the Shreveport refinery expansion. The Company was required to obtain approval of this modified air emissions permit from the LDEQ prior to commencing construction of the expansion activities. Upon receipt of the permit approval from the LDEQ, the Company commenced construction of the Shreveport refinery expansion project. On February 22, 2007, the Company received notice that on February 13, 2007 an individual filed, on behalf of the

Residents for Air Neutralization, a Petition for Review in the 19th Judicial District Court for East Baton Rouge Parish, Louisiana, asking the Court to review the approval granted by the LDEQ for the Company's application for a modified air emissions permit. The Petition alleges the information in the final LDEQ decision report was inaccurate and that, based on the LDEQ's decision to grant the modified air emissions permit, the LDEQ had not reviewed the evidence put before them properly. The Company believes that the Petition was not timely filed and is obtaining the necessary documentation for dismissal of the Petition. If the Petition is not dismissed, the LDEQ and the Company will defend the issuance of the permit. The Company believes that the LDEQ and the Company will be successful in defending the LDEQ's approval of the Company's application for a modified air emissions permit. The Company is not named at this time as a party to the Petition.

Table of Contents

Standby Letters of Credit

The Company has agreements with various financial institutions for standby letters of credit which have been issued to domestic vendors. As of March 31, 2007 and December 31, 2006, the Company had outstanding standby letters of credit of \$40,155 and \$42,775, respectively, under its senior secured revolving credit facility. The Company also had a \$50,000 letter of credit outstanding under the senior secured first lien letter of credit facility for its fuels hedging program, which bears interest at 3.50%.

7. Partners Capital

On January 31, 2006, the Partnership completed the initial public offering of its common units and sold 5,699,900 of those units to the underwriters in the initial public offering at a price to the public of \$21.50 per common unit. The Partnership also sold a total of 750,100 common units to certain relatives of the chairman of our general partner at a price of \$19.995 per common unit. In addition, on February 8, 2006, the Partnership sold an additional 854,985 common units to the underwriters at a price to the public of \$21.50 per common unit pursuant to the underwriters over-allotment option. Each of these issuances was made pursuant to the Partnership's Registration Statement on Form S-1 (File No. 333-128880) declared effective by the Securities and Exchange Commission on January 29, 2006. The proceeds received by the Partnership (net of underwriting discounts and structuring fees and before expenses) from the sale of an aggregate of 7,304,985 units were approximately \$144,400. The net proceeds were used to: (i) repay indebtedness and accrued interest under the first lien term loan facility in the amount of approximately \$125,700, (ii) repay indebtedness under the secured revolving credit facility in the amount of approximately \$13,100 and (iii) pay transaction fees and expenses in the amount of approximately \$5,600. Underwriting discounts totaled approximately \$11,600 (including certain structuring fees paid to certain of the underwriters of approximately \$2,400).

On July 5, 2006, the Partnership completed a follow-on public offering of its common units in which it sold 3,300,000 common units to the underwriters of the offering at a price to the public of \$32.94 per common unit. This issuance was made pursuant to the Partnership's Registration Statement on Form S-1 (File No. 333-134993) declared effective by the Securities and Exchange Commission on June 28, 2006. The proceeds received by the Partnership (net of underwriting discounts, commissions and expenses but before its general partner's capital contribution) from this offering was \$103,479. The use of proceeds from the offering was to: (i) repay all of its borrowings under its revolving credit facility, which were approximately \$9,243 as of June 30, 2006, (ii) fund the future construction and other start-up costs of the planned expansion project at the Shreveport refinery and (iii) to the extent available, for general partnership purposes. Underwriting discounts totaled \$4,620. The general partner contributed \$2,218 to retain its 2% general partner interest.

Of the 16,366,000 common units outstanding at March 31, 2007 10,604,985 are held by the public, with the remaining 5,761,015 held by affiliates. All of the 13,066,000 subordinated units are held by affiliates.

The Predecessor's policy was that distributions were limited to the amount necessary to pay each partner's federal income tax and any state income tax on their share of partnership income. However, additional distributions to the partners could be made at the sole discretion of the general partner. In January 2006, the Predecessor made its final distribution of \$6,900 to its partners. Subsequent to January 31, 2006, Calumet's distribution policy is as defined in the Partnership Agreement. During the three months ended March 31, 2007 and 2006, the Company made distributions of \$18,673 and \$0, respectively, to its partners.

On April 10, 2007, the Company declared a quarterly cash distribution of \$0.60 per unit on all outstanding units, or \$18,673, for the three months ended March 31, 2007. The distribution will be paid on May 15, 2007 to unitholders of record as of the close of business on May 5, 2007. This quarterly distribution of \$0.60 per unit equates to \$2.40 per unit on an annualized basis.

8. Segments and Related Information

a. Segment Reporting

Under the provisions of SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*, the Company has two reportable segments: Specialty Products and Fuel Products. The Specialty Products segment produces a variety of lubricating oils, solvents and waxes. These products are sold to customers who purchase these products primarily as raw material components for basic automotive, industrial and consumer goods. The Fuel

Products segment produces a variety of fuel and fuel-related products including gasoline, diesel and jet fuel.

- 15 -

Table of Contents

The accounting policies of the segments are the same as those described in the summary of significant accounting policies except that the Company evaluates segment performance based on income from operations. The Company accounts for intersegment sales and transfers at cost plus a specified mark-up. Reportable segment information is as follows :

Three Months Ended March 31, 2007	Specialty Products	Fuel Products	Combined Segments	Eliminations	Consolidated Total

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The historical condensed consolidated financial statements included in this Quarterly Report on Form 10-Q reflect all of the assets, liabilities and results of operations of Calumet Specialty Products Partners, L.P. ("Calumet") when used in the present tense, prospectively or for historical periods since January 31, 2006 and Calumet Lubricants Co., Limited Partnership ("Predecessor") for historical periods prior to January 31, 2006 where applicable. The following discussion analyzes the financial condition and results of operations of Calumet for the three months ended March 31, 2007 and 2006. The financial condition and results of operations for the three months ended March 31, 2006 are of Calumet and include the results of operation of the Predecessor from January 1, 2006 to January 31, 2006.

Unitholders should read the following discussion of the financial condition and results of operations for Calumet and the Predecessor in conjunction with the historical condensed consolidated financial statements and notes of Calumet and the Predecessor included elsewhere in this Quarterly Report on Form 10-Q.

Overview

We are a leading independent producer of high-quality, specialty hydrocarbon products in North America. Our business is organized into two segments: specialty products and fuel products. In our specialty products segment, we process crude oil into a wide variety of customized lubricating oils, solvents and waxes. Our specialty products are sold to domestic and international customers who purchase them primarily as raw material components for basic industrial, consumer and automotive goods. In our fuel products segment, we process crude oil into a variety of fuel and fuel-related products including unleaded gasoline, diesel and jet fuel. In connection with our production of specialty products and fuel products, we also produce asphalt and a limited number of other by-products. The asphalt and other by-products produced in connection with the production of specialty products at the Princeton, Cotton Valley and Shreveport refineries are included in our specialty products segment. The by-products produced in connection with the production of fuel products at the Shreveport refinery are included in our fuel products segment. The fuels produced in connection with the production of specialty products at the Princeton and Cotton Valley refineries are included in our specialty products segment. For the three months ended March 31, 2007, approximately 74.2% of our gross profit was generated from our specialty products segment and approximately 25.8% of our gross profit was generated from our fuel products segment.

Our fuel products segment began operations in 2004, as we substantially completed the approximately \$39.7 million reconfiguration of the Shreveport refinery to add motor fuels production, including gasoline, diesel and jet fuel, to its existing specialty products production as well as to increase overall feedstock throughput. The project was fully completed in February 2005. The reconfiguration was undertaken to capitalize on strong fuels refining margins, or crack spreads, relative to historical levels, to utilize idled assets, and to enhance the profitability of the Shreveport refinery's specialty products segment by increasing overall refinery throughput. In 2006, we commenced construction of an expansion project at our Shreveport refinery to increase throughput capacity and feedstock flexibility. Please read "Liquidity and Capital Resources" "Capital Expenditures" below.

Our sales and net income are principally affected by the price of crude oil, demand for specialty and fuel products, prevailing crack spreads for fuel products, the price of natural gas used as fuel in our operations and our results from derivative instrument activities.

Our primary raw material is crude oil and our primary outputs are specialty petroleum and fuel products. The prices of crude oil, specialty and fuel products are subject to fluctuations in response to changes in supply, demand, market uncertainties and a variety of additional factors beyond our control. We monitor these risks and enter into financial derivatives designed to mitigate the impact of commodity price fluctuations on our business. The primary purpose of our commodity risk management activities is to economically hedge our cash flow exposure to commodity price risk so that we can meet our cash distribution, debt service and capital expenditure requirements despite fluctuations in crude oil and fuel products prices. We enter into derivative contracts for future periods in quantities which do not exceed our projected purchases of crude oil and sales of fuel products. Please read Item 3 "Quantitative and Qualitative Disclosures about Market Risk" "Commodity Price Risk." As of March 31, 2007, we have hedged approximately 29 million barrels of fuel products through December 2011 at an average refining margin of \$11.93 per barrel and average refining margins range from a low of \$10.08 in the first and second quarters of 2011 to a high of \$12.66 in the third and fourth quarters of 2007. Please refer to Item 3 "Quantitative and Qualitative Disclosures About

Market Risk Commodity Price Risk Existing Commodity Derivative Instruments for a detailed listing of our hedge positions.

Our management uses several financial and operational measurements to analyze our performance. These measurements include the following:

Sales volumes;

Production yields; and

- 18 -

Table of Contents

Specialty products and fuel products gross profit.

Sales volumes. We view the volumes of specialty and fuels products sold as an important measure of our ability to effectively utilize our refining assets. Our ability to meet the demands of our customers is driven by the volumes of crude oil and feedstocks that we run at our refineries. Higher volumes improve profitability both through the spreading of fixed costs over greater volumes and the additional gross profit achieved on the incremental volumes.

Production yields. We seek the optimal product mix for each barrel of crude oil we refine in order to maximize our gross profits and minimize lower margin by-products which we refer to as production yield.

Specialty products and fuel products gross profit. Specialty products and fuel products gross profit are an important measure of our ability to maximize the profitability of our specialty products and fuel products segments. We define specialty products and fuel products gross profit as sales less the cost of crude oil and other feedstocks and other production-related expenses, the most significant portion of which include labor, plant fuel, utilities, contract services, maintenance and processing materials. We use specialty products and fuel products gross profit as an indicator of our ability to manage our business during periods of crude oil and natural gas price fluctuations, as the prices of our specialty products and fuel products generally do not change immediately with changes in the price of crude oil and natural gas. The increase in selling prices typically lags behind the rising costs of crude oil and other feedstocks for specialty products. Other than plant fuel, production-related expenses generally remain stable across broad ranges of throughput volumes, but can fluctuate depending on maintenance and turnaround activities.

In addition to the foregoing measures, we also monitor our general and administrative expenditures, substantially all of which are incurred through our general partner, Calumet GP, LLC.

- 19 -

Table of Contents**Three Months Ended March 31, 2007 Results of Operations**

The following table sets forth information about our combined refinery operations. Refining production volume differs from sales volume due to changes in inventory.

	Three Months Ended March 31,	
	2007	2006
Total sales volume (bpd)(1)	43,400	52,090
Total feedstock runs (bpd)(2)	45,420	52,370
Refinery production (bpd)(3):		
Specialty products:		
Lubricating oils	10,087	11,695
Solvents	5,198	4,346
Waxes	902	1,144
Fuels	2,138	2,508
Asphalt and other by-products	5,038	5,561
Total	23,363	25,254
Fuel products:		
Gasoline	7,836	10,002
Diesel	5,127	7,724
Jet fuel	7,160	7,308
By-products	1,187	297
Total	21,310	25,331
Total refinery production	44,673	50,585

(1) Total sales volume includes sales from the production of our refineries and sales of inventories.

(2) Feedstock runs represents the barrels per day of crude oil and other feedstocks processed at our refineries. The decrease in feedstock runs was primarily due to

turnarounds performed at our Shreveport and Princeton refineries in the first quarter of 2007, with no comparable activities in the first quarter of 2006.

- (3) Total refinery production represents the barrels per day of specialty products and fuel products yielded from processing crude oil and other refinery feedstocks at our refineries. The difference between total refinery production and total feedstock runs is primarily a result of the time lag between the input of feedstock and production of end products and volume loss.

Table of Contents

The following table reflects our consolidated results of operations and includes the non-GAAP financial measures EBITDA and Adjusted EBITDA. For a reconciliation of net income to EBITDA and Adjusted EBITDA as well as Adjusted EBITDA and EBITDA to cash flow from operating activities, our most directly comparable financial performance and liquidity measures calculated in accordance with GAAP, please read Non-GAAP Financial Measures .

Table of Contents

Non-GAAP Financial Measures

We include in this Quarterly Report on Form 10-Q the non-GAAP financial measures EBITDA and Adjusted EBITDA, and provide reconciliations of net income to EBITDA and Adjusted EBITDA and Adjusted EBITDA and EBITDA to net cash provided by operating activities, our most directly comparable financial performance and liquidity measures calculated and presented in accordance with GAAP.

EBITDA and Adjusted EBITDA are used as supplemental financial measures by our management and by external users of our financial statements such as investors, commercial banks, research analysts and others, to assess:

the financial performance of our assets without regard to financing methods, capital structure or historical cost basis;

the ability of our assets to generate cash sufficient to pay interest costs, support our indebtedness, and meet minimum quarterly distributions;

our operating performance and return on capital as compared to those of other companies in our industry, without regard to financing or capital structure; and

the viability of acquisitions and capital expenditure projects and the overall rates of return on alternative investment opportunities.

We define EBITDA as net income plus interest expense (including debt issuance and extinguishment costs), taxes and depreciation and amortization. We define Adjusted EBITDA to be Consolidated EBITDA as defined in our credit facilities. Consistent with that definition, Adjusted EBITDA means, for any period: (1) net income plus (2)(a) interest expense; (b) taxes; (c) depreciation and amortization; (d) unrealized losses from mark to market accounting for hedging activities; (e) unrealized items decreasing net income (including the non-cash impact of restructuring, decommissioning and asset impairments in the periods presented); and (f) other non-recurring expenses reducing net income which do not represent a cash item for such period; minus (3)(a) tax credits; (b) unrealized items increasing net income (including the non-cash impact of restructuring, decommissioning and asset impairments in the periods presented); (c) unrealized gains from mark to market accounting for hedging activities; and (d) other non-recurring expenses and unrealized items that reduced net income for a prior period, but represent a cash item in the current period. We are required to report Adjusted EBITDA to our lenders under our credit facilities and it is used to determine our compliance with the consolidated leverage test thereunder. We are required to maintain a consolidated leverage ratio of consolidated debt to Adjusted EBITDA, after giving effect to any proposed distributions, of no greater than 3.75 to 1 in order to make distributions to our unitholders. If an event of default exists under our credit agreements, the lenders will be able to accelerate the maturity of the credit facilities and exercise other rights and remedies. Please refer to **Liquidity and Capital Resources** **Debt and Credit Facilities** within this item for additional details regarding debt covenants.

EBITDA and Adjusted EBITDA should not be considered alternatives to net income, operating income, net cash provided by operating activities or any other measure of financial performance presented in accordance with GAAP. Our EBITDA and Adjusted EBITDA may not be comparable to similarly titled measures of another company because all companies may not calculate EBITDA and Adjusted EBITDA in the same manner. The following table presents a reconciliation of both net income to EBITDA and Adjusted EBITDA and Adjusted EBITDA and EBITDA to net cash provided by operating activities, our most directly comparable GAAP financial performance and liquidity measures, for each of the periods indicated.

Net cash provided by operating activities	\$ 42.8	\$ 60.1

(1) As a result of the adoption of FASB Staff Position No. AUG AIR-1, *Accounting for Planned Major Maintenance Activities*, on January 1, 2007, the Company recorded a reduction to cost of sales of \$0.3 million for the three months ended March 31, 2006, which resulted in an increase in EBITDA for the three months ended March 31, 2006 by the same amount. The adjustment did not have an effect on Adjusted EBITDA for three months ended March 31, 2006.

Table of Contents**Three Months Ended March 31, 2007 Compared to Three Months Ended March 31, 2006**

Sales. Sales decreased \$46.6 million, or 11.7%, to \$351.1 million in the three months ended March 31, 2007 from \$397.7 million in the three months ended March 31, 2006. Sales for each of our principal product categories in these periods were as follows:

	Three Months Ended March 31,		
	2007	2006	%
	(Dollars in millions)		
Sales by segment:			
Specialty products:			
Lubricating oils	\$ 116.7	\$ 132.9	(12.2%)

of fuels at the
Shreveport
refinery.

This \$46.6 million decrease in sales resulted from a \$27.9 million decrease in sales by our specialty products segment and a \$18.7 million decrease in sales by our fuel products segment.

Specialty products segment sales for the three months ended March 31, 2007 decreased \$27.9 million, or 12.1%, primarily due to a 14.2% decrease in volumes sold, from approximately 2.4 million barrels in the first quarter of 2006 to 2.1 million barrels in the first quarter of 2007. This decrease was primarily driven by decreased sales volume of 0.3 million barrels for lubricating oils and solvents combined, due primarily to scheduled turnaround activities at our Shreveport and Princeton refineries in the first quarter of 2007, with no similar activities in the comparable period in 2006. The decrease due to volume was offset by a 2.3% increase in the average selling price per barrel as compared to a 8.1% decrease in the average cost of crude, primarily driven by increased sales prices of lubricating oils due to market demand.

Fuel products segment sales for the three months ended March 31, 2007 decreased \$18.7 million, or 11.1%, primarily due to a 19.4% decrease in volumes sold, from approximately 2.3 million barrels in the first quarter of 2006 to 1.8 million barrels in the first quarter of 2007. This decrease was primarily driven by a 0.6 million barrel decrease in gasoline and diesel sales combined, due primarily to scheduled turnaround activities at our Shreveport refinery in the first quarter of 2007 with no similar activities in the comparable period in 2006. Fuel products sales were also negatively affected by a 2.9% decrease in the average selling price per barrel as compared to a 8.3% decrease in the average cost of crude primarily driven by decreases in gasoline and jet fuel sales prices due to market conditions. These decreases in sales were partially offset by the recognition of \$17.8 million of derivative gains on our fuel products cash flow hedges recorded in sales with no similar activity during the comparable period in 2006.

Gross Profit. Gross profit increased \$3.8 million, or 7.4%, to \$55.0 million for the three months ended March 31, 2007 from \$51.2 million (as adjusted) for the three months ended March 31, 2006. Gross profit for our specialty and fuel products segments were as follows:

- 24 -

Table of Contents

	Three Months Ended March 31,		
	2007	2006	%
		(As adjusted)	Change
	(Dollars in millions)		
Gross profit by segment:			
Specialty products	\$40.8	\$37.4	9.3%
Percentage of sales	20.2%	16.3%	
Fuel products	\$14.2	\$13.9	2.3%
Percentage of sales	9.5%	8.3%	
Total gross profit	\$55.0	\$51.2	7.4%
Percentage of sales	15.7%	12.9%	

This \$3.8 million increase in total gross profit includes an increase in gross profit of \$3.5 million in our specialty product segment and \$0.3 million in our fuel products segment.

The increase in our specialty products segment gross profit was primarily due to the average selling price increasing by 2.3% due to increases in lubricating oils sales prices compared to the decrease in the average cost of crude of 8.1%. The increase due to sales prices was offset by a 14.2% decrease in volumes sold, from approximately 2.4 million barrels in the first quarter of 2006 to 2.1 million barrels in the first quarter of 2007. This decrease was primarily driven by decreased sales volume of 0.3 million barrels for lubricating oils and solvents combined. In addition, specialty products segment gross profit was negatively affected by the recognition of \$2.3 million of increased derivative losses on our cash flow hedges of crude oil and natural gas purchases, with the remaining decrease primarily due to increased maintenance costs.

The increase in our fuel products segment gross profit was primarily driven by the average selling price decreasing by 2.9%, which was less than the decrease in the average cost of crude of 8.3%. The benefit from improved pricing was offset by a 19.4% decrease in volumes sold, from approximately 2.3 million barrels in the first quarter of 2006 to 1.8 million barrels in the first quarter of 2007. This decrease was primarily driven by a 0.6 million barrel decrease in gasoline and diesel sales combined. The fuel products segment gross profit was also negatively affected by the recognition of \$0.6 million of net derivative losses from our cash flow hedges of fuel products sales and crude oil purchases, with no similar activity during the comparable period in 2006.

Selling, general and administrative. Selling, general and administrative expenses increased \$0.5 million, or 9.5%, to \$5.4 million in the three months ended March 31, 2007 from \$4.9 million in the three months ended March 31, 2006. This increase was primarily due to increased costs associated with Section 404 of the Sarbanes-Oxley Act of 2002 compliance.

Transportation. Transportation expenses decreased \$0.3 million, or 2.4%, to \$13.6 million in the three months ended March 31, 2007 from \$13.9 million in the three months ended March 31, 2006. This decrease in transportation expense is primarily due to a 14.2% decrease in sales volume for the specialty products segment, offset by significant price increases for rail services that became effective during the third quarter of 2006. The majority of our transportation expenses are reimbursed by our customers and are reflected in sales in the consolidated statements of operations.

Interest expense. Interest expense decreased \$3.0 million, or 74.5%, to \$1.0 million in the three months ended March 31, 2007 from \$4.0 million in the three months ended March 31, 2006. This decrease was primarily due to the repayment of debt with the proceeds of the initial public offering, which closed on January 31, 2006, as well as repayment of the outstanding borrowings on the revolving credit facility subsequent to the first quarter of 2006.

Interest income. Interest income increased \$0.8 million to \$1.0 million in the three months ended March 31, 2007 from \$0.2 million in the three months ended March 31, 2006. This increase was primarily due to the investment of the remaining proceeds from our follow-on public offering, which closed on July 5, 2006. The Company did not have significant cash or cash equivalent balances in the first quarter of 2006 and, as a result, earned less interest income.

Debt extinguishment costs. Debt extinguishment costs were \$3.0 million in the three months ended March 31, 2006 and we incurred no such expenses in 2007. The expenses recorded in 2006 resulted from the repayment of a portion of borrowings under Calumet's term loan facility using the proceeds of the initial public offering, which closed on January 31, 2006.

Realized loss on derivative instruments. Realized loss on derivative instruments decreased \$1.3 million to a \$1.7 million loss in the three months ended March 31, 2007 from a \$3.1 million loss for the three months ended March 31, 2006. This decreased loss was primarily the result of the designation of certain derivatives as cash flow hedges. Thus, the settlement value of these derivatives is

- 25 -

Table of Contents

reflected in gross profit in the current period as compared to realized loss on derivative instruments during the same period in 2006.

Unrealized loss on derivative instruments. Unrealized loss on derivative instruments decreased in the three months ended March 31, 2007 from a \$17.7 million loss in the three months ended March 31, 2006 to a loss of \$4.8 million for the three months ended March 31, 2007. This decrease is primarily due the entire mark to market change of our derivative instruments being recorded to unrealized loss on derivative instruments in the prior year while in the current year Calumet has accounted for certain of these derivatives as cash flow hedges with mark to market changes on the effective portion of these hedges being recorded to accumulated other comprehensive income (loss) on the consolidated balance sheets.

Liquidity and Capital Resources

Our principal sources of cash have included cash flow from operations, proceeds from public offerings, issuance of private debt and bank borrowings. Principal historical uses of cash have included capital expenditures, growth in working capital, distributions and debt service. We expect that our principal uses of cash in the future will be to finance working capital, capital expenditures, distributions and debt service.

Cash Flows

We believe that we have sufficient liquid assets, cash flow from operations and borrowing capacity to meet our financial commitments, debt service obligations, contingencies and anticipated capital expenditures. However, we are subject to business and operational risks that could materially adversely affect our cash flows. A material decrease in our cash flow from operations would likely produce a corollary materially adverse effect on our borrowing capacity.

The following table summarizes our primary sources and uses of cash in the periods presented:

	Three Months Ended March 31,	
	2007	2006
	(In millions)	
Net cash provided by operating activities	\$ 42.8	\$ 60.1
Net cash used in investing activities	\$(41.7)	\$ (2.9)
Net cash used in financing activities	\$(18.8)	\$(69.3)

Operating Activities. Operating activities provided \$42.8 million in cash during the three months ended March 31, 2007 compared to \$60.1 million during the three months ended March 31, 2006. The cash provided by operating activities during the three months ended March 31, 2007 primarily consisted of net income after adjusting for non-cash items of \$32.8 million and a \$10.1 million increase due to changes in working capital. Net income after adjustments for non-cash items increased to \$32.8 million in 2007 from \$10.3 million in 2006 primarily as a result of an increase in net income of \$24.4 million. The increase due to changes in working capital was primarily due to a \$23.6 million increase in accounts payable due primarily to the rising cost of crude, offset by a \$11.0 million increase in current assets as a result of higher accounts receivable and prepaid expenses.

Investing Activities. Cash used in investing activities increased to \$41.7 million during the three months ended March 31, 2007 compared to a use of \$2.9 million during the three months ended March 31, 2006. This increase was primarily due to the \$35.6 million of additions to property, plant and equipment related to the Shreveport refinery expansion project during the first quarter of 2007, with no comparable expenditures in the first quarter of 2006.

Financing Activities. Financing activities used cash of \$18.8 million for the three months ended March 31, 2007 compared to using \$69.3 million for the three months ended March 31, 2006. This decrease is primarily due to the repayment of debt in the first quarter of 2006 using the proceeds of our initial public offering and cash provided by operations with no similar transactions in the first quarter of 2007. Cash used in financing activities in the first quarter of 2007 consisted primarily of distributions to partners of \$18.7 million.

On April 10, 2007, the Company declared a quarterly cash distribution of \$0.60 per unit on all outstanding units, or \$18.7 million, for the quarter ended March 31, 2007. The distribution will be paid on May 15, 2007 to unitholders of record as of the close of business on May 5, 2007. This quarterly distribution of \$0.60 per unit equates to \$2.40 per unit on an annualized basis.

Table of Contents***Capital Expenditures***

Our capital expenditure requirements consist of capital improvement expenditures, replacement capital expenditures and environmental capital expenditures. Capital improvement expenditures include expenditures to acquire assets to grow our business and to expand existing facilities, such as projects that increase operating capacity. Replacement capital expenditures replace worn out or obsolete equipment or parts. Environmental capital expenditures include asset additions to meet or exceed environmental and operating regulations. We previously expensed all costs associated with major maintenance and repairs (facility turnarounds) through the accrue-in-advance method over the period between turnarounds. The accounting method used for facility turnarounds changed effective January 1, 2007 as discussed below in *Recent Accounting Pronouncements*.

The following table sets forth our capital improvement expenditures, replacement capital expenditures and environmental capital expenditures in each of the periods shown.

	Three Months Ended March 31,	
	2007	2006
	(in millions)	
Capital improvement expenditures	\$ 38.6	\$ 1.7
Replacement capital expenditures	2.3	0.6
Environmental capital expenditures	0.8	0.7
Total	\$ 41.7	\$ 3.0

We anticipate that future capital improvement requirements will be provided through long-term borrowings, other debt financings, equity offerings and/or cash on hand. Until the Shreveport expansion project is complete, our ability to raise additional capital through the sale of common units is limited to 3,233,000 units.

Capital improvement expenditures for the three months ended March 31, 2007 of \$38.6 million were primarily related to the expansion project at our Shreveport refinery to increase its throughput capacity and its production of specialty products. The expansion project involves several of the refinery's operating units and is estimated to result in a crude oil throughput capacity increase of approximately 15,000 bpd, bringing total crude oil throughput capacity of the refinery to approximately 57,000 bpd. The expansion is expected to be completed in the third quarter of 2007 with production ramping up during the fourth quarter of 2007.

As part of the Shreveport refinery expansion project, we plan to increase the Shreveport refinery's capacity to process an additional 8,000 bpd of sour crude oil, bringing total capacity to process sour crude oil to 13,000 bpd. Of the anticipated 57,000 bpd throughput rate upon completion of the expansion project, we expect the refinery to have the capacity to process approximately 42,000 bpd of sweet crude oil and 13,000 bpd of sour crude oil, with the remainder coming from interplant feedstocks.

During the second quarter of 2006, we began purchasing equipment for the Shreveport expansion project and have incurred a total of \$100.5 million on capital expenditures for the expansion through March 31, 2007, with \$35.6 million of capital expenditures in the three months ended March 31, 2007. In July 2006, we completed a follow-on public offering of 3.3 million common units raising \$103.5 million to fund a significant portion of this project. Management estimates that Calumet will incur an additional \$99.5 million of capital expenditures in calendar year 2007 on the expansion project. We currently estimate the total cost of the Shreveport refinery expansion project will be approximately \$200.0 million, an increase of \$50.0 million from our previous estimate. This increase in the estimated cost of the expansion is due to further escalation in construction costs and an enhancement in the project to allow the Shreveport refinery to run an estimated 25,000 barrels per day of sour crude in the future subsequent to the planned completion of another capital project to add capacity and modify certain operating units. Cash on hand from the follow-on offering, cash flow from operations and borrowings under the secured revolving credit facility, to the extent necessary, are expected to fund these expenditures.

In order to accommodate our estimates of the increased cost of the Shreveport refinery expansion project and other planned capital expenditures, we will be required to amend certain provisions of our revolving and term loan credit facilities related to permitted capital expenditures. We anticipate that we will successfully complete the requisite amendments prior to the in-service date of the Shreveport refinery expansion project.

On February 22, 2007, we received notice that on February 13, 2007 an individual filed, on behalf of the Residents for Air Neutralization, a Petition for Review in the 19th Judicial District Court for East Baton Rouge Parish, Louisiana, asking the Court to review the approval granted by the LDEQ for our application for a modified air emissions permit. The Petition alleges the information in the final LDEQ decision report was inaccurate and that, based on the LDEQ's decision to grant the modified air emissions permit, the LDEQ had not reviewed the

- 27 -

Table of Contents

evidence put before them properly. We believe that the Petition was not timely filed and are obtaining the necessary documentation to dismiss the case. If the Petition is not dismissed, we and the LDEQ will defend the issuance of the permit. We believe that the LDEQ and us will be successful in defending the LDEQ's approval of our application for a modified air emissions permit. Neither we nor any of our subsidiaries is named at this time as a party to the Petition.

Debt and Credit Facilities

On December 9, 2005, we repaid all of our existing indebtedness under our prior credit facilities and entered into new credit agreements with syndicates of financial institutions for credit facilities that consist of:

a \$225.0 million senior secured revolving credit facility; and

a \$225.0 million senior secured first lien credit facility consisting of a \$175.0 million term loan facility and a \$50.0 million letter of credit facility to support crack spread hedging.

The revolving credit facility borrowings are limited by advance rates of percentages of eligible accounts receivable and inventory (the borrowing base) as defined by the revolving credit agreement. At March 31, 2007, we had borrowings of \$49.4 million under our term loan and no borrowings under our revolving credit facility. Our letters of credit outstanding as of March 31, 2007 were \$40.2 million under the revolving credit facility and \$50.0 million under the \$50.0 million letter of credit facility to support crack spread hedging.

The secured revolving credit facility currently bears interest at prime or LIBOR plus 100 basis points (which basis point margin may fluctuate), has a first priority lien on our cash, accounts receivable and inventory and a second priority lien on our fixed assets and matures in December 2010. On March 31, 2007, we had availability on our revolving credit facility of \$150.3 million, based upon its \$190.4 million borrowing base, \$40.2 million in outstanding letters of credit, and no outstanding borrowings.

The term loan facility bears interest at a rate of LIBOR plus 350 basis points and the letter of credit facility to support crack spread hedging bears interest at a rate of 3.5%. Each facility has a first priority lien on our fixed assets and a second priority lien on our cash, accounts receivable and inventory and matures in December 2012. Under the terms of our term loan facility, we applied a portion of the net proceeds we received from our initial public offering and the underwriters' over-allotment option as a repayment of the term loan facility, and are required to make mandatory repayments of approximately \$0.1 million at the end of each fiscal quarter, beginning with the fiscal quarter ended March 31, 2006 and ending with the fiscal quarter ending December 31, 2011. At the end of each fiscal quarter in 2012 we are required to make mandatory repayments of approximately \$11.8 million per quarter, with the remainder of the principal due at maturity. On April 24, 2006, the Company entered into an interest rate swap agreement with a counterparty to fix LIBOR component of the interest rate on a portion of outstanding borrowings under its term loan facility. The notional amount of the interest rate swap agreement is 85% of the outstanding term loan balance over its remaining term, with LIBOR fixed at 5.44%.

Our letter of credit facility to support crack spread hedging is secured by a first priority lien on our fixed assets. We have issued a letter of credit in the amount of \$50.0 million, the full amount available under the letter of credit facility, to one counterparty. As long as this first priority lien is in effect and such counterparty remains the beneficiary of the \$50.0 million letter of credit, we will have no obligation to post additional cash, letters of credit or other collateral with such counterparty to provide additional credit support for a mutually-agreed maximum volume of executed crack spread hedges. In the event such counterparty's exposure exceeds \$100.0 million, we would be required to post additional credit support to enter into additional crack spread hedges up to the aforementioned maximum volume. In addition, we have other crack spread hedges in place with other approved counterparties under the letter of credit facility whose credit exposure to us is also secured by a first priority lien on our fixed assets.

The credit facilities permit us to make distributions to our unitholders as long as we are not in default or would not be in default following the distribution. Under the credit facilities, we are obligated to comply with certain financial covenants requiring us to maintain a Consolidated Leverage Ratio of no more than 3.75 to 1 (as of the end of each fiscal quarter and after giving effect to a proposed distribution or other restricted payments as defined in the credit agreement) and available liquidity of at least \$30.0 million (after giving effect to a proposed distribution or other restricted payments as defined in the credit agreements). The Consolidated Leverage Ratio is defined under our credit agreements to mean the ratio of our Consolidated Debt (as defined in the credit agreements) as of the last day of any

fiscal quarter to our Adjusted EBITDA (as defined below) for the four fiscal quarter period ending on such date. Available Liquidity is a measure used under our credit agreements to mean the sum of the cash and borrowing capacity under our revolving credit facility that we have as of a given date. Adjusted EBITDA means Consolidated EBITDA as defined in our credit facilities to mean, for any period: (1) net income

- 28 -

Table of Contents

plus (2)(a) interest expense; (b) taxes; (c) depreciation and amortization; (d) unrealized losses from mark to market accounting for hedging activities; (e) unrealized items decreasing net income (including the non-cash impact of restructuring, decommissioning and asset impairments in the periods presented); and (f) other non-recurring expenses reducing net income which do not represent a cash item for such period; minus (3)(a) tax credits; (b) unrealized items increasing net income (including the non-cash impact of restructuring, decommissioning and asset impairments in the periods presented); (c) unrealized gains from mark to market accounting for hedging activities; and (d) other non-recurring expenses and unrealized items that reduced net income for a prior period, but represent a cash item in the current period.

In addition, at any time that our borrowing capacity under our revolving credit facility falls below \$25.0 million, we must maintain a Fixed Charge Coverage Ratio of at least 1 to 1 (as of the end of each fiscal quarter). The Fixed Charge Coverage Ratio is defined under our credit agreements to mean the ratio of (a) Adjusted EBITDA minus Consolidated Capital Expenditures minus Consolidated Cash Taxes, to (b) Fixed Charges (as each such term is defined in our credit agreements). We anticipate that we will continue to be in compliance with the financial covenants contained in our credit facilities and will, therefore, be able to make distributions to our unitholders.

In addition, our credit agreements contain various covenants that limit, among other things, our ability to: incur indebtedness; grant liens; make certain acquisitions and investments; make capital expenditures above specified amounts; redeem or prepay other debt or make other restricted payments such as distributions to unitholders; enter into transactions with affiliates; enter into a merger, consolidation or sale of assets; and cease our refining margin hedging program (our lenders have required us to obtain and maintain derivative contracts for fuel products margins in our fuel products segment for a rolling two-year period for at least 40%, and no more than 80%, of our anticipated fuels production). On June 19 and 22, 2006, the Company amended its credit agreements to increase the amount of permitted capital expenditures with respect to the Shreveport refinery expansion project as well as annual capital expenditure limitations. Please read *Capital Expenditures* above for the amendments we will seek in order to accommodate the increased capital expenditures we expect in connection with the completion of the Shreveport refinery expansion and other planned capital expenditures.

If an event of default exists under our credit agreements, the lenders will be able to accelerate the maturity of the credit facilities and exercise other rights and remedies. An event of default is defined as nonpayment of principal interest, fees or other amounts; failure of any representation or warranty to be true and correct when made or confirmed; failure to perform or observe covenants in the credit agreement or other loan documents, subject to certain grace periods; payment defaults in respect of other indebtedness; cross-defaults in other indebtedness if the effect of such default is to cause the acceleration of such indebtedness under any material agreement if such default could have a material adverse effect on us; bankruptcy or insolvency events; monetary judgment defaults; asserted invalidity of the loan documentation; and a change of control in us. As of March 31, 2007, we believe we are in compliance with all debt covenants and has adequate liquidity to conduct its business.

Equity Transactions

On January 31, 2006, we completed the initial public offering of our common units and sold 5,699,900 of those units to the underwriters of the initial public offering at a price to the public of \$21.50 per common unit. We also sold a total of 750,100 common units to certain other investors at a price of \$19.995 per common unit. In addition, on February 8, 2006, we sold an additional 854,985 common units to the underwriters at a price to the public of \$21.50 per common unit pursuant to the underwriters' over-allotment option. We received total net proceeds of approximately \$144.4 million. The net proceeds were used to: (i) repay indebtedness and accrued interest under the first lien term loan facility in the amount of approximately \$125.7 million, (ii) repay indebtedness under the secured revolving credit facility in the amount of approximately \$13.1 million and (iii) pay transaction fees and expenses in the amount of approximately \$5.6 million.

On July 5, 2006, we completed a follow-on public offering of common units in which we sold 3,300,000 common units to the underwriters of this offering at a price to the public of \$32.94 per common unit and received net proceeds of \$103.5 million. The net proceeds were used (or will be used) to: (i) repay all of our borrowings under our revolving credit facility, which were approximately \$9.2 million as of June 30, 2006, (ii) fund the future construction and other start-up costs of the planned expansion project at our Shreveport refinery and (iii) to the extent available, for general

partnership purposes. The general partner contributed an additional \$2.2 million to us to retain its 2% general partner interest.

Recent Accounting Pronouncements

In July 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, *Accounting for Uncertainty*

- 29 -

Table of Contents

in *Income Taxes* (the Interpretation), an interpretation of FASB Statement No. 109. The Interpretation clarifies the accounting for uncertainty in income taxes by prescribing a recognition threshold and measurement methodology for the financial statement recognition and measurement of a tax position to be taken or expected to be taken in a tax return. The Interpretation is effective for fiscal years beginning after December 15, 2006. The Company adopted the Interpretation on January 1, 2007. The adoption did not have a material effect on its financial position, results of operations or cash flow. Interest and penalties related to income taxes, if any, would be recorded in income tax expense on the condensed consolidated statements of operations. We had no unrecognized tax benefits as of March 31, 2007 and December 31, 2006. Our income taxes generally remain subject to examination by major tax jurisdictions for a period of three years.

In September 2006, the FASB issued FASB Staff Position No. AUG AIR-1, *Accounting for Planned Major Maintenance Activities* (the Position), which amends certain provisions in the AICPA Industry Audit Guides, *Audits of Airlines*, and APB Opinion No. 28, *Interim Financial Reporting*. The Position prohibits the use of the accrue-in-advance method of accounting for planned major maintenance activities (turnaround costs) and requires the use of the direct expensing method, built-in overhaul method, or deferral method. The Position is effective for fiscal years beginning after December 15, 2006.

The Company adopted the Position on January 1, 2007 and began using the deferral method to account for turnaround costs. Under this method, actual costs of an overhaul are capitalized as incurred and amortized to cost of sales until the next overhaul date. Prior to the adoption of this standard, the Company accrued for such overhaul costs in advance and recorded the change to cost of sales. As a result of the adoption of the Position, the Company has retrospectively adjusted prior periods to account for turnaround costs as capitalized costs, recorded in other noncurrent assets on the balance sheets, in lieu of accrued turnaround costs. The cumulative effect of the adoption of the Position on prior periods was \$3.3 as of January 1, 2005. The adoption of the Position also resulted in a net decrease in cost of sales of \$299 (\$0.02 per limited partner unit) for the three months ended March 31, 2006 from the amounts previously reported.

In September 2006, the FASB issued FASB Statement No. 157, *Fair Value Measurements* (the Statement). The Statement applies to assets and liabilities required or permitted to be measured at fair value under other accounting pronouncements. The Statement defines fair value, establishes a framework for measuring fair value, and expands disclosure requirements about fair value, but does not provide guidance whether assets and liabilities are required or permitted to be measured at fair value. The Statement is effective for fiscal years beginning after November 15, 2007. The Company does not anticipate that this Statement will have a material effect on its financial position, results of operations, or cash flow.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

Our profitability and cash flows are affected by changes in interest rates, specifically LIBOR and prime rates. The primary purpose of our interest rate risk management activities is to hedge our exposure to changes in interest rates.

We are exposed to market risk from fluctuations in interest rates. As March 31, 2007, we had approximately \$49.4 million of variable rate debt. Holding other variables constant (such as debt levels) a one hundred basis point change in interest rates on our variable rate debt as of March 31, 2007 would be expected to have an impact on net income and cash flows for 2007 of approximately \$0.5 million.

Commodity Price Risk

Both our profitability and our cash flows are affected by volatility in prevailing crude oil, gasoline, diesel, jet fuel, and natural gas prices. The primary purpose of our commodity risk management activities is to hedge our exposure to price risks associated with the cost of crude oil and natural gas and sales prices of our fuel products.

Crude Oil Price Volatility

We are exposed to significant fluctuations in the price of crude oil, our principal raw material. Given the historical volatility of crude oil prices, this exposure can significantly impact product costs and gross profit. Holding all other variables constant, and excluding the impact of our current hedges, we expect a \$1.00 change in the per barrel price of crude oil would change our specialty product segment cost of sales by \$8.6 million and our fuel product segment cost of sales by \$7.6 million on an annual basis based on our results for the three months ended March 31, 2007.

Table of Contents

Crude Oil Hedging Policy

Because we typically do not set prices for our specialty products in advance of our crude oil purchases, we can take into account the cost of crude oil in setting prices. We further manage our exposure to fluctuations in crude oil prices in our specialty products segment through the use of derivative instruments. Our policy is generally to enter into crude oil derivative contracts for three to nine months forward and for 50% to 75% of our anticipated crude oil purchases related to our specialty products production and for up to five years and no more than 75% of our fuel products purchases on average for each fiscal year.

Natural Gas Price Volatility

Since natural gas purchases comprise a significant component of our cost of sales, changes in the price of natural gas also significantly affect our profitability and our cash flows. Holding all other cost and revenue variables constant, and excluding the impact of our current hedges, we expect a \$0.50 change per MMBtu (one million British Thermal Units) in the price of natural gas would change our cost of sales by \$3.0 million on an annual basis based on our results for the three months ended March 31, 2007.

Natural Gas Hedging Policy

In order to manage our exposure to natural gas prices, we enter into derivative contracts. Our policy is generally to enter into natural gas swap contracts during the summer months for approximately 50% or more of our upcoming fall and winter months' anticipated natural gas requirements.

Fuel Products Selling Price Volatility

We are exposed to significant fluctuations in the prices of gasoline, diesel, and jet fuel. Given the historical volatility of gasoline, diesel, and jet fuel prices, this exposure can significantly impact sales and gross profit. Holding all other variables constant, and excluding the impact of our current hedges, we expect that a \$1.00 change in the per barrel selling price of gasoline, diesel, and jet fuel would change our forecasted fuel products segment sales by \$7.3 million on an annual basis based on our results for the three months ended March 31, 2007.

Fuel Products Hedging Policy

In order to manage our exposure to changes in gasoline, diesel, and jet fuel selling prices, we enter into fuels product swap contracts. Our policy is to enter into derivative contracts to hedge our fuel products sales for a period no greater than five years forward and for no more than 75% of anticipated fuels sales on average for each fiscal year, which is consistent with our crude purchase hedging policy for our fuel products segment discussed above. We believe this policy lessens the volatility of our cash flows. In addition, in connection with our credit facilities, our lenders require us to obtain and maintain derivative contracts to hedge our fuels product margins for a rolling two-year period for at least 40%, and no more than 80%, of our anticipated fuels production. Until March 31, 2006, the historical impact of fair value fluctuations in our derivative instruments has been reflected in the realized/unrealized gain (loss) on derivative instruments line items in our consolidated statements of operations. Effective April 1, 2006, we have restructured and designated certain derivative contracts for our fuel products segment as cash flow hedges under SFAS 133 of gasoline, diesel, and jet fuel sales, and the effective portion of these hedges is recorded in accumulated other comprehensive income (loss) until the underlying transaction hedged is recognized in the consolidated statements of operations.

The unrealized gain or loss on derivatives at a given point in time is not necessarily indicative of the results realized when such contracts mature. The decrease in the fair market value of our outstanding derivative instruments from a net asset of \$37.8 million as of December 31, 2006 to a net liability of \$33.3 million as of March 31, 2007 was due to increases in the forward market values of fuel products margins, or cracks spreads, relative to our hedged fuel products margins during the first quarter of 2007. Please read "Derivatives" in Note 5 to our unaudited condensed consolidated financial statements for a discussion of the accounting treatment for the various types of derivative transactions, and a further discussion of our hedging policies.

Table of Contents***Existing Commodity Derivative Instruments***

The following tables provide information about our derivative instruments as of March 31, 2007:

Crude Oil Swap Contracts by Expiration Dates	Barrels	BPD	(\$/Bbl)
Second Quarter 2007	1,728,000	18,989	\$ 64.68
Third Quarter 2007	1,742,000	18,935	65.51

Totals	350,000	
Average price		\$ 8.97

Item 4T. Controls and Procedures

(a) Evaluation of disclosure controls and procedures.

Our principal executive officer and principal financial officer have evaluated, as required by Rule 13a-15(b) under the Securities Exchange Act of 1934 (the Exchange Act), our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on that evaluation, the principal executive officer and principal financial officer concluded that the design and operation of our disclosure controls and procedures are effective in ensuring that information we are required to disclose in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

PART II**Item 1. Legal Proceedings**

We are not a party to any material litigation. Our operations are subject to a variety of risks and disputes normally incident to our business. As a result, we may, at any given time, be a defendant in various legal proceedings and litigation arising in the ordinary course of business. Please see Note 6 "Commitments and Contingencies" in Part I Item 1 "Financial Statements" for a description of our current regulatory matters related to the environment.

Item 1A. Risk Factors

In addition to the other information included in this Quarterly Report on Form 10-Q and the risk factors reported in our Annual Report on Form 10-K for the period ended December 31, 2006, you should consider the following risk factor in evaluating our business and future prospects. If any of the risks contained in this Quarterly Report or our Annual Report occur, our business, results of operations, financial condition and ability to make cash distributions to our unitholders could be materially adversely affected.

We have adopted certain valuation methodologies that may result in a shift of income, gain, loss and deduction between the general partner and the unitholders. The IRS may challenge this treatment, which could adversely affect the value of the common units.

When we issue additional units or engage in certain other transactions, we determine the fair market value of our assets and allocate any unrealized gain or loss attributable to our assets to the capital accounts of our unitholders and our general partner. Our methodology may be viewed as understating the value of our assets. In that case, there may be a shift of income, gain, loss and deduction between certain unitholders and the general partner, which may be unfavorable to such unitholders. Moreover, subsequent purchasers of common units may have a greater portion of their Internal Revenue Code Section 743(b) adjustment allocated to our tangible assets and a lesser portion allocated

to our intangible assets. The IRS may challenge our valuation methods, or our allocation of the Section 743(b) adjustment attributable to our tangible and intangible assets, and allocations of income, gain, loss and deduction between the general partner and certain of our unitholders.

- 34 -

Table of Contents

A successful IRS challenge to these methods or allocations could adversely affect the amount of taxable income or loss being allocated to our unitholders. It also could affect the amount of gain from our unitholders' sale of common units and could have a negative impact on the value of the common units or result in audit adjustments to our unitholders' tax returns without the benefit of additional deductions.
