Table of Contents**DELL INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)****NOTE 1 BASIS OF PRESENTATION**

The accompanying unaudited condensed consolidated financial statements of Dell Inc. (Dell) should be read in conjunction with the consolidated financial statements and notes thereto filed with the U.S. Securities and Exchange Commission (the SEC) in Dell s Annual Report on Form 10-K for the fiscal year ended January 31, 2003. The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). In the opinion of management, the accompanying condensed consolidated financial statements reflect all adjustments of a normal recurring nature considered necessary to present fairly the financial position of Dell and its consolidated subsidiaries as of October 31, 2003 and January 31, 2003; the results of their operations for the three and nine months ended October 31, 2003 and November 1, 2002; and cash flows for the nine months ended October 31, 2003 and November 1, 2002.

	<u> </u>	<u> </u>
	\$ 358	\$ 306
	<u> </u>	<u> </u>

NOTE 3 EARNINGS PER COMMON SHARE, INCLUDING PRO FORMA EFFECTS OF STOCK-BASED COMPENSATION

Basic earnings per share is based on the weighted effect of all common shares issued and outstanding and is calculated by dividing net income by the weighted average shares outstanding during the period. Diluted earnings per share is calculated by dividing net income by the weighted average number of common shares used in the basic earnings per share calculation plus the number of common shares that would be issued assuming conversion of all potentially dilutive common shares outstanding.

Table of Contents

The following table sets forth the computation of basic and diluted earnings per share for the three and nine months ended October 31, 2003 and November 1, 2002, and illustrates the effect on net income and earnings per share as if Dell had applied the fair value recognition provisions of Statement of Financial Accounting Standards (SFAS) No. 123, *Accounting for Stock-Based Compensation*, to stock-based employee compensation.

	Three Months Ended		Nine Months Ended	
	October 31, 2003	November 1, 2002	October 31, 2003	November 1, 2002
	(in millions, except per share amounts)			
Net income as reported	\$ 677	\$ 561	\$ 1,896	\$ 1,519
Deduct: Total stock-based employee compensation determined under fair value method for all awards, net of related tax effects	178	181	616	543
Net income pro forma	\$ 499	\$ 380	\$ 1,280	\$ 976
Weighted average shares outstanding:				
Basic	2,563	2,582	2,568	2,587
Employee stock options and other	60	52	52	64
Diluted	2,623	2,634	2,620	2,651
Earnings per common share:				
Basic as reported	\$ 0.26	\$ 0.22	\$ 0.74	\$ 0.59
Basic pro forma	\$ 0.19	\$ 0.15	\$ 0.50	\$ 0.38
Diluted as reported	\$ 0.26	\$ 0.21	\$ 0.72	\$ 0.57
Diluted pro forma	\$ 0.19	\$ 0.14	\$ 0.49	\$ 0.37

Under SFAS No. 123, the value of each option is estimated on the date of grant using the Black-Scholes option pricing model, which was developed for use in estimating the value of freely traded options. Similar to other option pricing models, it requires the input of highly subjective assumptions, including stock price volatility. Because (1) Dell's employee stock options have characteristics significantly different from those of traded options and (2) changes in the subjective input assumptions can materially affect the estimated fair value, management's opinion is that the existing option pricing models (including Black-Scholes) do not provide a reliable measure of the fair value of Dell's employee stock options.

Dell excludes equity instruments from the calculation of diluted weighted average shares outstanding if the effect of including such instruments is antidilutive. Accordingly, certain employee stock options and equity put contracts (for the fiscal 2003 periods only) have been excluded from the calculation of diluted weighted average shares. These shares totaled 135 million and 190 million for the third quarter of fiscal 2004 and 2003, respectively, and 145 million and 194 million during the nine months ended October 31, 2003 and November 1, 2002, respectively.

Table of Contents**NOTE 4 COMPREHENSIVE INCOME**

Dell's comprehensive income is comprised of net income, foreign currency translation adjustments, unrealized gains and losses on derivative financial instruments related to foreign currency hedging, and unrealized gains and losses on marketable securities classified as available-for-sale. Comprehensive income for the three and nine months ended October 31, 2003 and November 1, 2002, was as follows:

	Three Months Ended		Nine Months Ended	
	October 31, 2003	November 1, 2002	October 31, 2003	November 1, 2002
(in millions)				
Comprehensive income:				
Net income	\$677	\$561	\$1,896	\$1,519
Foreign currency translations	3	(1)	1	2
Unrealized gains (losses) on foreign currency hedging instruments	(74)	29	(19)	(62)
Unrealized gains (losses) on marketable securities	3	(13)	(41)	26
	—	—	—	—
Total comprehensive income, net of taxes	\$609	\$576	\$1,837	\$1,485
	—	—	—	—

NOTE 5 AGGREGATE PRODUCT WARRANTY LIABILITY

Changes in Dell's aggregate product warranty liability for the nine months ended October 31, 2003 are presented in the following table:

	Nine Months Ended October 31, 2003
	(in millions)
Aggregate liability at beginning of period	\$1,309
Cost accrued for standard warranties and separately priced extended warranty and service contracts issued during the period	1,007
Obligations honored during the period	(726)
	—
Aggregate liability at end of period	\$1,590
	—

NOTE 6 TRANSACTIONS WITH VARIABLE INTEREST ENTITIES**Dell Financial Services**

Dell is currently a partner in Dell Financial Services L.P. (DFS), a joint venture with CIT Group Inc. (CIT). The joint venture allows Dell to provide its customers with various financing alternatives while CIT provides the financing for the transaction between DFS and the customer. In general, DFS facilitates customer financing transactions through either loan or lease financing. For customers who desire loan financing, Dell sells equipment directly to customers who, in turn, enter into loans with CIT to finance their purchases. For customers who desire lease financing, Dell usually sells the equipment to DFS, and DFS enters into direct financing lease arrangements with the customers.

Dell currently owns a 70% equity interest in DFS. In accordance with the partnership agreement between Dell and CIT, losses generated by DFS are fully allocated to CIT. Net income generated by DFS is allocated 70% to Dell and 30% to CIT, after CIT has recovered any cumulative

Edgar Filing: DELL INC - Form 10-Q

losses. If DFS is terminated with a cumulative deficit, Dell is not obligated to fund any losses. CIT has no recourse or rights of return to Dell, except that end-user customers may return equipment pursuant to Dell's standard return policy. Although Dell has a 70% equity interest in DFS, prior to the third quarter of fiscal 2004 the investment was accounted for under the equity method because the company historically could not, and currently does not, exercise control over DFS.

In January 2003, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 46 (FIN 46), *Consolidation of Variable Interest Entities*. FIN 46 provides that if an entity is the primary beneficiary of a Variable Interest Entity (VIE), the assets, liabilities, and results of operations of the VIE should be consolidated in the entity's financial statements. Based on the guidance in FIN 46, Dell concluded

Table of Contents

that DFS is a VIE and Dell is the primary beneficiary of DFS's expected cash flows. Accordingly, Dell began consolidating DFS's financial results at the beginning of the third quarter of fiscal 2004. The consolidation of DFS had no impact on Dell's net income or earnings per share during the three and nine months ended October 31, 2003 because Dell has historically been recording its 70% equity interest in DFS under the equity method. The impact to any individual line item on Dell's condensed consolidated statement of operations was not material; however, the consolidation of DFS increased Dell's consolidated assets and liabilities as of October 31, 2003 by \$588 million. CIT's equity ownership in the net assets of DFS as of October 31, 2003 was \$14 million and is recorded as minority interest in other non-current liabilities on Dell's condensed consolidated statement of financial position. The consolidation has not altered the partnership agreement or risk sharing arrangement between Dell and CIT.

DFS maintains various facilities with CIT which provide DFS with a funding capacity of up to \$1.0 billion. As of October 31, 2003, outstanding advances under these facilities totaled \$166 million and are included in other current and non-current liabilities on Dell's condensed consolidated statement of financial position. Advances under these facilities are collateralized by residual assets and bear a weighted average interest rate of approximately 7.63%.

Master Lease Facilities

Dell historically maintained master lease facilities which provided the company with the ability to lease certain real property, buildings, and equipment to be constructed or acquired. These leases have historically been accounted for as operating leases by Dell. During the nine months ended October 31, 2003, Dell paid \$636 million to purchase all of the assets covered by its master lease facilities. Accordingly, Dell has no remaining lease commitments under these master lease facilities.

NOTE 7 SEGMENT INFORMATION

Dell conducts operations worldwide and is primarily managed on a geographic basis, with those geographic segments being the Americas, Europe, and Asia Pacific-Japan regions. The Americas region, which is based in Round Rock, Texas, covers the United States, Canada, South America, and Latin America. Dell has two reportable segments within the Americas: Business and U.S. Consumer. The Americas Business segment includes sales to commercial, government, and education customers. The European region, which is based in Bracknell, England, covers Europe, the Middle East, and Africa. The Asia Pacific-Japan region covers the Pacific Rim, including Australia and New Zealand, and is based in Singapore.

Table of Contents

The accounting policies of Dell's reportable segments are the same as those described in the summary of significant accounting policies in its Annual Report on Form 10-K for the fiscal year ended January 31, 2003. Dell allocates resources to and evaluates the performance of its segments based on operating income. Corporate expenses are included in Dell's measure of segment operating income for management reporting purposes. The table below presents information about Dell's reportable segments for the three and nine month periods ended October 31, 2003 and November 1, 2002:

	Three Months Ended		Nine Months Ended

Table of Contents

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Statements in this Report that relate to future results and events are based on Dell's current expectations. Actual results in future periods may differ materially from those currently expected or desired because of a number of risks and uncertainties. For a discussion of factors affecting Dell's business and prospects, see Item 1 Business Factors Affecting Dell's Business and Prospects in Dell's Annual Report on Form 10-K for the fiscal year ended January 31, 2003.

All percentage amounts and ratios were calculated using the underlying data in thousands. Operating results for the interim periods are not necessarily indicative of the results that may be expected for the full fiscal year. All references to industry market share and growth data are based upon information provided by International Data Corporation.

Third Quarter Overview

Dell through its direct business model designs, develops, manufactures, markets, sells, and supports a wide range of computer systems and services that are customized to customer requirements. These include enterprise systems (servers, storage, networking products, and workstations), notebook and desktop computer systems, software and peripherals, and service and support programs. During the third quarter of fiscal 2004, Dell's year-over-year performance continued to outpace the industry. Year-over-year net unit shipments increased 22% during the third quarter as Dell increased its worldwide market share by 1.4 points and maintained its position as the world's No. 1 supplier of personal computing systems with 17.1% market share. Net revenue increased 16% year-over-year to \$10.6 billion during the quarter with operating expenses remaining at a record low 9.6% of net revenue. During the third quarter, Dell continued its focus on maximizing operating dollars by achieving record operating profits and net income of \$912 million and \$677 million, respectively. Dell also delivered strong liquidity with cash flows from operations of \$2.6 billion during the nine months ended October 31, 2003 and ended the quarter with record cash, cash equivalents, and investments of \$11.0 billion. Dell's low-cost structure and efficient direct-to-customer model have enabled the company to consistently achieve year-over-year market share growth while maximizing operating profitability.

During the third quarter of fiscal 2004, Dell continued to focus on standards-based technologies and utilized its direct-to-customer model to drive down costs through efficient supply chain management. Dell's model inherently provides cost advantages in manufacturing, operations, and its supply chain. The direct-to-customer model also provides Dell with a constant flow of information about trends in customers' plans and requirements. These trends have shown an increased use of standards-based technologies as well as a push towards standardization of services. Unlike proprietary technologies promoted by some of Dell's top competitors, standards-based technologies provide customers with flexibility and choice while allowing their purchasing decisions to be based on performance, cost, and customer service. This is a trend that favors Dell's ability to drive for profitable share growth and extend further into the enterprise.

While the current competitive environment remains challenging, overall technology spending continued to show signs of stabilization with the market (including Dell) producing its fifth consecutive quarter of positive year-over-year unit growth. The year-over-year industry unit growth of 17% (including Dell) during the third quarter is the highest growth rate during this five-quarter period. Management intends to maintain its current strategy of profitable market share growth with a focus on improving overall profitability.

Table of Contents**Results of Operations**

The following table summarizes the results of Dell's operations for the three and nine months ended October 31, 2003 and November 1, 2002:

	Three Months Ended				Nine Months Ended			
	October 31, 2003		November 1, 2002		October 31, 2003		November 1, 2002	
	Dollars	% of Net Revenue	Dollars	% of Net Revenue	Dollars	% of Net Revenue	Dollars	% of Net Revenue
	(dollars in millions)							
Net revenue	\$ 10,622	100.0%	\$ 9,144	100.0%	\$ 29,932	100.0%	\$ 25,669	100.0%
Gross margin	1,935	18.2%	1,662	18.2%	5,461	18.2%	4,568	17.8%
Operating expenses	1,023	9.6%	904	9.9%	2,898	9.7%	2,543	9.9%
Operating income	912	8.6%	758	8.3%	2,563	8.6%	2,025	7.9%
Net income	\$ 677	6.4%	\$ 561	6.1%	\$ 1,896	6.3%	\$ 1,519	5.9%

Net Revenue

Net revenue was \$10.6 billion for the third quarter of fiscal 2004, an increase of \$1.5 billion from the same quarter last year. Net revenue increased to \$29.9 billion for the nine months ended October 31, 2003, from \$25.7 billion for the nine months ended November 1, 2002. The year-over-year increase in net revenue was driven by strong net unit growth across all regions and product lines. Dell continues to focus on extending its capabilities in the enterprise with an increase in product mix of enterprise systems from 20% to 22% of net revenue during the third quarter, compared to the same quarter last year. Dell's server business drove the year-over-year increase in enterprise systems net revenue during both the three and nine months ended October 31, 2003, while external storage also produced strong revenue growth over the same periods. Dell gained 1.4 share points in the worldwide server market and strengthened its No. 2 share position to 23%, compared to the same quarter last year. The revenue growth in storage has been supported by Dell's partnership with EMC Corporation and the Dell/EMC CX200 storage array. During the third quarter, Dell's notebook and desktop product lines produced year-over-year revenue growth of 14% and 7%, respectively. In addition, services achieved year-over-year revenue growth of 31% during the quarter, while software and peripherals net revenue was also up 26% over the same period.

Dell's year-over-year net unit growth continued to outpace the market with consolidated net unit shipments increasing 22% during the third quarter while the industry increased only 15% (excluding Dell). However, this growth was partially offset by a 5% decrease in average revenue per-unit sold during the quarter as compared to the same period last year. This decline primarily resulted from the increased competitive pricing environment during the current fiscal year. Despite the continued competitive pricing environment, Dell has outperformed the market by increasing year-over-year market share while improving operating profitability. Dell will continue to adjust its pricing as necessary in response to future competitive and economic conditions.

The following table summarizes Dell's net revenue by geographic region:

	Three Months Ended		Nine Months Ended	
	October 31, 2003	November 1, 2002	October 31, 2003	November 1, 2002
	(in millions)			
Net revenue:				
Americas:				
Business	\$ 5,815	\$ 5,099	\$ 16,274	\$ 14,532
U.S. Consumer	1,695	1,450	4,567	3,764
Total Americas	7,510	6,549	20,841	18,296

Edgar Filing: DELL INC - Form 10-Q

Europe	2,048	1,723	5,942	4,907
Asia Pacific-Japan	1,064	872	3,149	2,466
	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Total net revenue	\$ 10,622	\$ 9,144	\$ 29,932	\$ 25,669
	<u> </u>	<u> </u>	<u> </u>	<u> </u>

Americas Dell increased its No. 1 market share position year-over-year by approximately 2 share points to 31% in the U.S. and 28% in the Americas overall. Year-over-year net unit growth was 20% during the third

Table of Contents

quarter while net revenue increased 15% and 14% during the three and nine months ended October 31, 2003, respectively. The year-over-year increase in revenue was broad-based but primarily led by growth in enterprise systems of 32% and 27% during the three and nine months ended October 31, 2003, respectively.

In the Americas Business segment, year-over-year net revenue increased 14% and 12% during the three and nine months ended October 31, 2003, respectively. Enterprise systems provided the majority of the growth, with servers contributing more than one-half of the increase in enterprise product revenue during both the three and nine months ended October 31, 2003.

In the U.S. Consumer segment, year-over-year net revenue grew 17% and 21% during the three and nine months ended October 31, 2003, respectively. Dell produced strong year-over-year net unit growth in notebooks during the third quarter of 67%; however, this growth was partially offset by a decline in average revenue per-unit sold.

Europe Dell continued its strong performance in Europe and strengthened its No. 2 share position year-over-year with market share gains of approximately 0.7 share points to 10.7% market share. Net unit shipments grew year-over-year by 26% during the third quarter, achieving net unit growth in excess of 20% across all product lines. Net revenue during the three and nine months ended October 31, 2003 increased by 19% and 21% on a year-over-year basis, respectively. This included combined year-over-year net revenue growth of 21% in the focus countries of United Kingdom, France, and Germany during the third quarter.

Asia Pacific-Japan Dell generated year-over-year market share gains of approximately 1.4 share points to 7.2% market share and the No. 3 share position in Asia Pacific-Japan. Dell's net unit growth was 35% in a market that increased only 15% (excluding Dell). Net revenue growth during the three and nine months ended October 31, 2003 was broad based and increased year-over-year by 22% and 28%, respectively. This increase included combined year-over-year net revenue growth of 22% in the focus countries of Japan and China during the third quarter.

Gross Margin

Gross margin as a percentage of net revenue remained at 18.2% during the third quarter of fiscal 2004, as compared the third quarter of fiscal 2003. Gross margin was 18.2% for the nine months ended October 31, 2003 and 17.8% during the same period last year. The year-over-year improvement for the nine months ended October 31, 2003 was primarily driven by Dell's cost savings initiatives. As part of management's focus on improving margins, Dell remains committed to reducing costs through four primary cost reduction initiatives: manufacturing costs, warranty costs, structural or design costs, and overhead or operating expenses. These cost savings initiatives also include providing certain customer technical support and back-office functions from cost effective locations as well as driving more efficient processes and tools globally. Dell's general practice is to aggressively pass on declines in costs to its customers in order to add customer value while increasing market share.

Dell currently expects the component cost and competitive pricing environment will continue to be challenging. Management believes that the strength of Dell's direct-to-customer business model, as well as its strong liquidity position, makes Dell better positioned than its competitors to continue profitable market share growth in any business climate.

Operating Expenses

The following table presents certain information regarding Dell's operating expenses during the periods indicated:

	Three Months Ended				Nine Months Ended			
	October 31, 2003		November 1, 2002		October 31, 2003		November 1, 2002	
	Dollars	% of Net Revenue	Dollars	% of Net Revenue	Dollars	% of Net Revenue	Dollars	% of Net Revenue
	(dollars in millions)							
Selling, general and administrative	\$ 905	8.5%	\$ 787	8.6%	\$ 2,553	8.5%	\$ 2,205	8.6%
Research, development and engineering	118	1.1%	117	1.3%	345	1.2%	338	1.3%
Total operating expenses	\$ 1,023	9.6%	\$ 904	9.9%	\$ 2,898	9.7%	\$ 2,543	9.9%

Table of Contents

During the third quarter, Dell maintained its record low operating expenses as a percentage of net revenue of 9.6%, compared to 9.9% in the same quarter last year. The decrease was primarily a result of previously referred to cost reduction initiatives.

Selling, general and administrative During the three and nine months ended October 31, 2003, selling, general and administrative expenses increased in absolute dollars when compared to the same periods last year. This increase was commensurate with the corresponding increase in net revenue as Dell continues to invest in global expansion efforts as part of its strategy to profitably gain market share. However, due to strong revenue growth Dell was able to achieve lower selling, general and administrative expenses as a percentage of net revenue of 8.5% during the third quarter of fiscal 2004, down from 8.6% in the same quarter last year.

Research, development and engineering Dell continues to invest in research, development and engineering activities to develop and introduce new products and to support its continued goal of improving and developing efficient procurement, manufacturing, and distribution processes. Research, development and engineering expenses during the three and nine months ended October 31, 2003 remained relatively flat year-over-year but decreased slightly as a percentage of net revenue. Dell expects to continue to invest in research, development and engineering activity, with an increasing emphasis on enterprise systems, including servers and storage. As of October 31, 2003, Dell had received 941 U.S. patents and applied for an additional 597 patents.

Investment and Other Income, net

Investment and other income, net, decreased slightly during the three and nine months ended October 31, 2003, compared to the same periods last year, and primarily includes interest income and expense, gains and losses from the sale of investments, and foreign exchange transaction gains and losses. For the third quarter of fiscal 2004 and 2003, investment and other income, net, was \$41 million and \$44 million, respectively. For the nine months ended October 31, 2003 and November 1, 2002, investment and other income, net, was \$131 million and \$141 million, respectively.

Income Taxes

Dell's effective tax rate was 29% for the third quarter of fiscal 2004, as compared to 30% for the same quarter last year. For both the nine month periods ended October 31, 2003 and November 1, 2002, Dell's effective tax rate was approximately 30%. Differences between the effective tax rate and the U.S. federal statutory rate of 35% principally result from Dell's geographical distribution of taxable income and losses and from differences between book and tax treatment of certain items. Dell's effective tax rate may continue to decline in future periods as the company's business outside the U.S. in lower tax jurisdictions continues to expand and become an increasing portion of operating profits.

Liquidity and Capital Resources*Liquidity*

The following table summarizes the results of Dell's statement of cash flows for the nine months ended October 31, 2003 and November 1, 2002:

	October 31, 2003	November 1, 2002
	(in millions)	
Net cash flow provided by (used in):		
Operating activities	\$ 2,612	\$ 2,401
Investing activities	(1,840)	(645)
Financing activities	(1,003)	(1,653)
Effect of exchange rate changes on cash and cash equivalents	355	290
	<u> </u>	<u> </u>
Net increase in cash and cash equivalents	\$ 124	\$ 393
	<u> </u>	<u> </u>

Cash provided by operating activities during the nine months ended October 31, 2003 was \$2.6 billion, as compared to \$2.4 billion for the same period last year. Cash flows from operating activities resulted primarily from net income during both periods and represents Dell's principal source of cash. In addition to net income, operating cash flows have historically been impacted by improvement in Dell's cash conversion cycle and, to a lesser extent, income tax benefits that result from the exercise of employee stock options.

Table of Contents

Cash used in investing activities for the nine months ended October 31, 2003 was \$1.8 billion, as compared to \$645 million for the same period last year. Cash used in investing activities principally consists of net purchases of investments and capital expenditures for property, plant and equipment. The increase during the nine months ended October 31, 2003, when compared to the same period last year, was primarily due to the increase in purchases of investments, net of maturities and sales, as Dell continues to invest its cash provided by operating activities. During the nine months ended October 31, 2003, Dell also purchased \$636 million in assets that were held in master lease facilities and previously classified as operating leases. These cash outflows were partially offset by cash assumed in the consolidation of DFS of \$172 million.

Cash used in financing activities during the nine months ended October 31, 2003 was \$1.0 billion, as compared to \$1.7 billion during the same period last year. Financing activities primarily consist of the repurchase of Dell common stock, partially offset by the issuance of common stock under employee stock option plans. The decrease during the nine months ended October 31, 2003, compared to the same period last year, was due to an increase in the number of shares issued as a result of the exercise of stock options, combined with a decrease in the aggregate value of common stock repurchased by Dell.

The following table presents selected financial statistics and information:

	October 31, 2003	January 31, 2003
	(dollars in millions)	
Cash, cash equivalents, and investments	\$ 11,032	\$ 9,905
Days of sales outstanding ^(a)	31	28
Days of supply in inventory	4	3
Days in accounts payable	71	68
	_____	_____
Cash conversion cycle	(36)	(37)
	_____	_____

(a) Days of sales outstanding include the effect of product costs related to in-transit customer shipments that are classified in other current assets. As of October 31, 2003 and January 31, 2003, days of sales outstanding included days of sales in accounts receivable and days of in-transit customer shipments of 27 and 4 days and 24 and 4 days, respectively.

Dell ended the third quarter of fiscal 2004 with a company record \$11.0 billion in cash, cash equivalents, and investments, an increase of \$1.1 billion from January 31, 2003. Dell invests a large portion of its available cash in highly liquid/highly rated government, agency and corporate debt securities of varying maturities at the date of acquisition. Dell's investment policy is to manage its investment portfolio to preserve principal and liquidity while maximizing the return on the investment portfolio through the full investment of available funds. As of October 31, 2003, Dell had \$9.5 billion invested in these securities. Additionally, Dell invests in equity securities of various private and public entities in order to enhance and extend Dell's strategic initiatives. As of October 31, 2003, these equity investments totaled \$155 million. The remaining \$1.3 billion of the \$11.0 billion in cash, cash equivalents, and investments, principally consists of cash.

Dell continued to maintain an efficient asset management system with a cash conversion cycle of negative 36 days during the third quarter of fiscal 2004. Dell defers the cost of revenue associated with in-transit customer shipments until they are delivered and revenue is recognized. These deferred costs are included in Dell's reported days of sales outstanding because management believes it illustrates a more conservative and accurate presentation of Dell's days of sales outstanding and cash conversion cycle. These deferred costs are recorded in other current assets in Dell's condensed consolidated statement of financial position and totaled \$501 million and \$423 million as of October 31, 2003 and January 31, 2003, respectively.

Dell has historically generated annual cash flows from operating activities in amounts greater than net income, driven mainly by efficient cash conversion cycle metrics. Management currently believes that fiscal 2004 cash flows from operations will continue to exceed net income. Management also believes that Dell's cash flow from operations will continue to be strong and more than sufficient to support its operations and capital requirements, even if economic conditions should deteriorate. Dell currently anticipates that it will continue to utilize its strong liquidity and cash flows to repurchase its common stock, make a limited number of strategic equity investments, consider and possibly make acquisitions, invest in systems and processes, and invest in the development and growth of its enterprise products.

Table of Contents

Capital Commitments

Consolidation of Leasing Affiliate Dell is currently a partner in DFS, a joint venture with CIT. The joint venture allows Dell to provide its customers with various financing alternatives while CIT provides the financing for the transaction between DFS and the customer. See Note 6 of Notes to Condensed Consolidated Financial Statements included in Item 1 Financial Statements.

Due to the adoption of FIN 46, Dell began consolidating DFS's financial results at the beginning of the third quarter of fiscal 2004. The consolidation of DFS had no impact on Dell's net income or earnings per share during the three and nine months ended October 31, 2003 because Dell has historically been recording its 70% equity interest in DFS under the equity method. The impact to any individual line item on Dell's condensed consolidated statement of operations was not material; however, the consolidation of DFS increased Dell's consolidated assets and liabilities as of October 31, 2003 by \$588 million. The consolidation has not altered the partnership agreement or risk sharing arrangement between Dell and CIT.

Although Dell has no economic exposure to the existing assets and liabilities of DFS, should the joint venture experience an interruption in operations, Dell would likely have to find alternative sources for future financing arrangements with its customers. Dell's alternatives could include negotiating a financing arrangement with another entity or financing customer purchases itself. Absent such an alternative financing arrangement, Dell could experience reductions in cash flows due to losses in originations of financing arrangements. Currently, Dell does not anticipate any such interruption in DFS operations.

Restricted Cash Pursuant to the joint venture agreement between DFS and CIT, DFS is required to maintain certain escrow cash accounts. Accordingly, due to the consolidation of DFS during the third quarter of fiscal 2004, \$194 million in restricted cash is included in Dell's condensed consolidated statement of financial position as of October 31, 2003.

Capital Expenditures Dell spent \$267 million on property, plant, and equipment during the nine months ended October 31, 2003. Product demand and mix, as well as ongoing efficiencies in operating and information technology infrastructure, influence the level and prioritization of Dell's capital expenditures. Capital expenditures for all of fiscal 2004 are currently expected to be approximately \$350 million.

Master Lease Facilities Dell historically maintained master lease facilities which provided the company with the ability to lease certain real property, buildings, and equipment to be constructed or acquired. These leases have historically been accounted for as operating leases by Dell. During the nine months ended October 31, 2003, Dell paid \$636 million to purchase all of the assets covered by its master lease facilities. Accordingly, Dell has no remaining lease commitments under these master lease facilities.

Long Term Debt As of October 31, 2003, Dell had outstanding \$200 million in Senior Notes due April 15, 2008 and \$300 million in Senior Debentures due April 15, 2028. Concurrent with the issuance of the Senior Notes and Senior Debentures, Dell entered into interest rate swap agreements converting Dell's interest rate exposure from a fixed rate to a floating rate basis to better align the associated interest rate characteristics to its cash and investments portfolio. The interest rate swap agreements have an aggregate notional amount of \$200 million maturing April 15, 2008 and \$300 million maturing April 15, 2028. The floating rates are based on three month London Interbank Offered Rates (LIBOR) plus 0.41% and 0.79% for the Senior Notes and Senior Debentures, respectively.

Share Repurchases Dell has a share repurchase program that authorizes the purchase of up to 1.25 billion shares of common stock to manage the dilution resulting from shares issued under Dell's employee stock plans. Dell expects to repurchase shares of common stock through a systematic program of open market purchases that will return cash to stockholders and mitigate dilution. During the nine months ended October 31, 2003, Dell repurchased 48 million shares for an aggregate cost of \$1.5 billion and expects to repurchase approximately \$500 million of shares during the fourth quarter of fiscal 2004.

Recently Issued Accounting Pronouncements

In January 2003, the SEC issued a final rule requiring enhanced disclosure of material off-balance sheet transactions, arrangements, and other relationships with unconsolidated entities. The rule also requires a tabular disclosure of future payments due under contractual commitments. The disclosure requirements will become effective for Dell's fiscal 2004 Annual Report on Form 10-K. Dell does not expect this pronouncement to have a material impact on its consolidated results of operations or financial position.

Table of Contents

In May 2003, the Emerging Issues Task Force (EITF) reached a consensus on Issue No. 01-8, *Determining Whether an Arrangement Contains a Lease* , which was ratified by the FASB in May 2003. EITF 01-8 establishes criteria to be applied to any new or modified agreement in order to ascertain if such agreement is in effect a lease, and therefore subject to lease accounting treatment and disclosure requirements principally found in SFAS No. 13, *Accounting for Leases* . The provisions of EITF Issue No. 01-8 are effective for arrangements entered into or modified as of August 2, 2003. This pronouncement did not have a material impact on Dell consolidated results of operations or financial position.

Factors Affecting Dell s Business and Prospects

There are numerous factors that affect Dell s business and the results of its operations. These factors include general economic and business conditions; the level of demand for Dell s products and services; the effect of armed hostilities, terrorism or public health issues on the economy generally, on the level of demand for Dell s products and services, and on Dell s ability to manage its supply and delivery logistics in such an environment; the level and intensity of competition in the technology industry and the pricing pressures that have resulted; the ability of Dell to timely and effectively manage periodic product transitions, as well as component availability and cost; the ability of Dell to develop new products based on new or evolving technology and the market s acceptance of those products; the ability of Dell to manage its inventory levels to minimize excess inventory, declining inventory values and obsolescence; the product, customer and geographic sales mix of any particular period; and Dell s ability to effectively manage its operating costs. For a discussion of these and other factors affecting Dell s business and prospects, see Item 1 Business Factors Affecting Dell s Business and Prospects in Dell s Annual Report on Form 10-K for the fiscal year ended January 31, 2003.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

For a description of Dell s market risks, see Item 7 Management s Discussion and Analysis of Financial Condition and Results of Operations Market Risk in Dell s Annual Report on Form 10-K for the fiscal year ended January 31, 2003.

ITEM 4. Controls and Procedures

The management of Dell, with the participation of Dell s Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of Dell s disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this Report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that Dell s disclosure controls and procedures are effective in enabling Dell to record, process, summarize, and report information required to be included in Dell s periodic SEC filings within the required time period.

In addition, the management of Dell, with the participation of Dell s Chief Executive Officer and Chief Financial Officer, has evaluated whether any change in Dell s internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) occurred during the period covered by this Report. Based on that evaluation, Dell s Chief Executive Officer and Chief Financial Officer have concluded that there has been no change in Dell s internal control over financial reporting during the period covered by this Report that has materially affected, or is reasonably likely to materially affect, Dell s internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. *Legal Proceedings*

Dell is subject to various legal proceedings and claims arising in the ordinary course of business. Dell's management does not expect that the outcome in any of these legal proceedings, individually or collectively, will have a material adverse effect on Dell's financial condition, results of operations, or cash flows.

ITEM 6. *Exhibits and Reports on Form 8-K*

(a) Exhibits.

- 31.1 Certification of Michael S. Dell, Chairman of the Board and Chief Executive Officer, pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934
- 31.2 Certification of James M. Schneider, Senior Vice President and Chief Financial Officer, pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934
- 32.1 Certifications of Michael S. Dell, Chairman of the Board and Chief Executive Officer, and James M. Schneider, Senior Vice President and Chief Financial Officer, pursuant to 18 U.S.C. Section 1350

(b) Reports on Form 8-K.

On August 14, 2003, Dell filed a current report on Form 8-K reporting that it had issued a press release regarding its financial results for the fiscal quarter ended August 1, 2003.
